Meowth - June 11, 2012, 1:08 pm

damn maybe if it didn't say, "stealer" on the site name it would be more believable other than that great tool.

Un-Named - June 11, 2012, 1:11 pm

Okay, so first of all if you guys haven't noticed, I'm 100% sure OP made multiple accounts to vouch for his infected "tool".

lol'd at this post, I thought it was hilarious that OP made 3 new accounts all after the time that this thread was made.

Post reported for infected link.

Perker - June 11, 2012, 1:18 pm

Shut the fuck up queer. Go make another account and see if you can bypass skirex.exe

Thread was made "Today, 11:20 AM"

Hatrick came to post here but his account was made
Today 12:51 PM

Astonishingly, he came to your post to say thanks and left immediately.
Then we have Mr.Hacksir who registered after the thread creation asking for help to set up your DC

He said he added you from a skype, that skype doesn't exist.

<https://gyazo.com/d175b40a5ab020e5d4957076b9aec784>

He then came to this thread to vouch for you.

Then in your posts you said that you knew the website had a virus on it, but now you thank yourself for having a keyscrambler.

I don't like people like you.
