Slaves Can't kill the bot with task manager!

About

A lot of work went into this little program. Though Some snippets aren't mine, i used them in a way that others can learn from. My goal was to make a botnet/host booter that was so simple that anyone could pick it up and take down a connection or two. Now that I've moved on to other projects, someone else can learn from this the same way I did. Now i can't stop those from ripping or selling this so i guess out of 10 rippers, there will be 1 person that will genuinely learn from the source. Have fun like i did! ?

Features

Simplicity

Stability

FUD

Strong UDP and SSYN

USB Spread

Process killing protection

Polymorphic encryption for secure communications

PS:

I know that the source is a bit messy and sorry ;)

If you see your snippet in the source and not in the credits, please PM and i'll add you. Sorry in advance!

I would really like to have this

This is exactly what I was looking for...finally.

My Botnet has a really bad UDP Flood attacking method

even with 50 computers I am unable to boot anyone offline (XBL)

Since yours is strong maybe I could change things and simply use yours while I find a way to fix mine.

Its summer so im busy.

I hope you could send me the link.
