1. Introduction:

I don't know if this was posted before but I'm posting this to help all the newbies with spreading their viruses. In this tutorial I will explain how to use large social network and human greed in your advantage.

2. Getting ready:

Okay, in this part we will get ready for spreading. This means you will have to create your virus, check if it's working etc. First, you need to decide what kind of virus you will use. You can use RAT's, keyloggers etc. If you're interested in gaining complete access to someones PC then you should use a RAT. If you just want to get a shitload of email/facebook/others usernames and passwords then use a keylogger.

[You can learn more about RAT's here.](#)

[You can learn more about keyloggers here.](#)

[Also, for tutorials on how to setup a certain RAT or a keylogger go here.](#)

What do the users want? Well, they usually want some dumb things like "Speed up Facebook" or "Poker Hack" and things like that. Just download a fake program or better yet, make one on your own and bind it with your virus.

Also, it is important that your virus and/or fake program has an icon because it will look more legit and better.

If you are looking for a program that is able to extract (from .dll's, .exe's...) and edit icons check this website: <http://icofx.ro/>

Short tutorial on IcoFx.

3. Fake programs:

Why do you need a fake program? We will be infecting people with "fake" hacks, programs etc. You need to show them something after your virus is executed so they can think the program actually works. This will give you some time before they find out they're infected (if they find out :D).

Well, you have two choices here. You can download someone's fake program or you can make one on your own. If you want to download one look for it here: [Hacking Tools and Programs](#)

If you want to create a fake program then keep reading, if not skip to part 4.

To create a fake program you need some software. I recommend Visual Basic 2008.

You can download it here: <http://www.microsoft.com/express/Windows/>

After you installed it start it up. Click around, try to find your way around the program first. When you're done take a look at [this](#) section for some nice tutorials. Believe me, it's not that hard as it seems ?

4. Spreading technique:

Okay, this is what you were waiting for. We will be infecting people by using Facebook's groups and pages.

First go here: <http://www.facebook.com/pages/create.php>

Category: Doesn't really matter what you choose.

Name of page: What ever you want, ex, you have a fake poker hacking program. You will then call the page like "Poker Chips Hack [+20M] [100% working]" or something like that.

Click on create.

Now you are redirected to your page. First go to the info box and click on "Edit Information".

Type in the description in the info box.

Example (copied from some poker hack fb page):

Code >>>To quickly invite all your friends:

1. Click on Suggest to Friends
2. Copy this code:

```
javascript:elms=document.getElementById('friends').getElementsByTagName('li');for(var fid in elms){if(typeof elms[fid] === 'object'){fs.click(elms[fid]);}}
```

3. Paste it in your browser address bar then hit enter to select all your friends automatically(Works only with firefox)

{if you don't have firefox install it or select at least 200 friends}

4. Click "Send Invitations".

5. Go to DISCUSSIONS and post your guest list

Here is the DOWNLOAD LINK:

<http://www.mediafire.com/?hzwzycbzkz0>

I got 100 of messages in my inbox :S

so here you are the LINK

NOTE: Money you have x2 = Money to add

You have 100k enter 100000

Money to add 200k enter 200000

PS: JUST USE ONE TIME

Now, the most important part!

Go to the Wall and click on "Settings". Uncheck "Fans can write or post content on the wall". This will prevent your fans posting things like "OMG viruz, dunt download!!1!!!" and shit like that.

Now add images and things to make it look like a real thing. Don't forget, put some SS's of you having a shitload of chips etc. (paint ftw xD)

5. Outro:

Well, thats all. I can't guarantee that you will have thousands of fans but as more work you put into that the results will be better. This is my first tutorial so be easy on me. Thanks for reading! ?

Nice way of spreading. I haven't seen a tutorial explain how to spread on facebook. I like it. Thanks for the share

SlaYoRz - February 3, 2010, 7:09 pm

I just saw something about this on the news rofl.

Noxin - February 3, 2010, 7:12 pm

Anyone tested this?

If not, i'm going to do it now. Will post how it goes!

.crudd™ - February 3, 2010, 7:21 pm

GoodTutorial dude, and haha you saw something on the news about this wtf? ? ? jeesh we are famous!

Know Hope - February 3, 2010, 7:48 pm

Very good tutorial, I'm using the method right now.

Cypher66 - February 3, 2010, 8:08 pm

I'd always use keyloggers that I said were 'farmville bots', people are obsessed with that game on facebook haha

ThE_CriMiNaL - February 4, 2010, 1:15 am

thanks for this tutorial. good post.

andiesanchez - February 4, 2010, 1:21 am

This will definitely come to good use.

Thank you for the share :)

EASTBAY LOC - February 11, 2010, 11:57 pm

sorry but to me this tut is way too simple a retard can do it =/

Sub-Zero96 - February 12, 2010, 12:14 am

i was doing this befour this tut ? ? ?

lorens13 - February 12, 2010, 2:18 am

Wow,this is really nice,I am also going to use this in my second wave of spreading,thanks for sharing it on HF^^

drugboy - February 12, 2010, 2:23 am

Thanks for this. I made a group with texas poker hacks and i have some 50 people in group, but ive only infected 3-4 :/ My logger isnt FUD :(

geogas - February 12, 2010, 5:32 pm

using the methos still no victims...|

Wise - February 12, 2010, 5:53 pm

Been doing it for quite some time, it is best to use other people's account and invite their friends. It starts off slowly and it spread pretty fast ^^ - If you can code vb6 - its even better.

bonsainess - December 5, 2011, 9:17 pm

nice :D the important part that i learned is the firefox thingy and the select all thingy code :) like it very mch. thank you..

tajnost - December 5, 2011, 9:33 pm

Maybe one last step for this tut would be purchase some facebook ad's, only \$1 per 1000 impressions ;-)

just make sure you made the page with fake profile through tor nd what not
sTaY sAFe peOPLe :D

bernardbear - December 6, 2011, 10:35 am

very nice tutorial dude,it will help a beginner how to spread their virus.thanks

hackeye - December 6, 2011, 11:02 am

Nice radio activity U235 <<uranium.

No bad method?

Darksider28 - January 3, 2015, 6:06 am

Nice tut man will be playing around with this.

SIM-2524147 - January 3, 2015, 1:18 pm

Thank you for this great tutorial mate will have to try this!

faverte - January 5, 2015, 7:51 pm

interesting tutorial, thank you for allowing us to share your knowledge with

Too High - January 5, 2015, 10:39 pm

Very nice tutorial. Might use this actually.

Tryptadream - January 5, 2015, 11:05 pm

Good tutorial. Leaves just enough room for creativity of the masses. I remember doing something like this long ago except instead of infecting with my RAT it sent their browser cookies my way for certain online sites and I would use their profile and do some shady things. Those were the days. Reading this made me want to get back into it.

dawdaw2 - January 5, 2015, 11:52 pm

Haha this method is very simple, but on the other hand a very powerful one :D Thanks for sharing this tutorial
