Thread: [The message is too short. Please enter a message longer than 35 characters.](#)

This is wrong, you can enter a message that is not longer than 35 characters, but is 35 characters. So it should be at least 35 characters, not longer than 35 characters.. That should be fixed. ?

I mean you can make a post that is 35 characters. Even though the rules say it needs to be LONGER than 35. Which would mean 36-18000

What the hell are you trying to say?

eight - June 14, 2012, 7:17 pm

Jesus christ. My post got removed in like 3 seconds...

I did it like this:

Code [align=left][align=left][align=left][align=left][align=left][align=left]Like
this?[/align][[/align][[/align][[/align][[/align][[/align]

It's happened to me a few times, it's a minor glitch.

No, it says it needs to be longer than 35 char, even when you can ALWAYS make a reply with 35 char.

EDIT: Just so it doesn't get removed :p
Not using the align bologna or invisible characters.

ProductiveHQ - June 14, 2012, 7:27 pm

When you press a character it counts as 1 :DD So the [align] [b] [spoiler] [code] and so on don't really count i guess :D But if you type then in manually it might count ;D

^^

34 characters, didn't work.
Pretty sure at least 35 characters is not considered 34 characters.
