Thread: [TUTORIAL | Verify US Craigslist Ads | FREE](#)

aspirin - June 16, 2012, 12:17 pm

Recently, I've been seeing a lot of threads where people are asking how to do the verification for posting ads in US section of Craigslist. Numbers on sites like pinger, etc don't work there as CL has banned them. You need to use a real US number.

This method basically uses simple e-whoring to get you to verify it:

1. Get your CL ad all ready for posting and you should be on the section where it asks for your number.
2. Goto chat-avenue's adult chat/teen chat section and post as a girl that you're looking for free phone sex with US guys only.
3. Some guys will PM you. Talk to 2-3 guys at the same time as some guys may not give you the code.
4. Tell them that you're gonna call them but they'll have to first tell you a code that you're gonna send them so that you can verify that they're the right guy. If they ask why, tell them that earlier some guys had given you the wrong no, and you don't wanna do the same mistake again.
5. They should now give you their no. Enter it in Craigslist. Use the text option. CL will send them a code. It gets delivered almost instantly.
6. Ask them for the code. Most guys will tell you the code.

Hope this helps. Good luck =)

Just pointing it out, but that one isn't original either.

Yeah, I know. This method has been discussed here before and like I stated in the thread, many threads were being created in the last 2-3 days asking the same thing.

I am not claiming credit either and I know most experienced members here would know about this method.

I just want to help the new guys out.

I have been using this method for over a year now. Works every time! ?

FakeID - June 22, 2012, 12:35 am

I could submit ads without any verification even tho I live in Croatia. However not a single man has responded to my ad via email. Craigslist seems just too saturated for me, I found a way better, unsaturated site :P

Conflexity - June 22, 2012, 6:50 am

This helps me so fucking much. I appreciate you. lol

arnie4444 - June 22, 2012, 8:10 pm

it doesn't work. Because the automated call or sms craigslist sends, has the word "craigslist" right in it along with the email associated with your ad. So the person you're trying to scam knows its craigslist calling and then they don't tell you the code.

It has worked for me always or if they don't give you the code, just move on to another guy.

I'll try this,

thnx for sharing. ^^

Device1 - June 30, 2012, 6:50 pm

Couldn't u also use google voice to get the code from Craigslist?

Stockman - June 30, 2012, 6:59 pm

I forgot to switch it to text, and Craigslist called them. I told the guy I was selling stuff and I accidentally entered his number, so he wrote it down and told it to me. I was aware of the method (it started with Omegle) but I hadn't attempted it for awhile ;)

Edit: It was ghosted.

aspirin - February 10, 2013, 3:52 am

Just ing this as this method still works.

Big G - November 16, 2013, 3:25 am

I know it's been a while but I don't know where to ask this. I did confirmed my account on craigslist, but my posts keep getting ghosted. Why is that happening and what should I do? Thank you very much guys.
