spectrum10 - June 16, 2012, 6:55 pm

Useless :/ screw winbloze, UNIX! then no big real worry about viruses!

ISHackers - June 16, 2012, 6:56 pm

dont trust me.====> and dont download it :) only those who trust me, downnload it . its 100% safe.

spectrum10 - June 16, 2012, 7:00 pm

Im not saying i trust you or not bc either way im not downloading it bc i dont use winbloze. But for the users that do i think you should post a virus scan.

Ichi - June 16, 2012, 8:57 pm

Yeah this is a little suspicious...Virus Scan anyone?

Thursd?y - June 16, 2012, 9:45 pm

Just some advice IShackers, People are really stingy on this forum. Seeing as it's a hacking forum, You should post a virus scan showing it's clean.

lowpro - June 16, 2012, 10:00 pm

@ Ichi

@ spectrum10
