Platinum Hide IP – Give You Platinum Online Privacy Protection. Everyday we read more and more stories about hackers breaking into big businesses, stealing their identities and wreaking general havoc. It's no wonder that we've become wary of the Internet and concerned about the Internet privacy. Use Platinum Hide IP to keep your real IP address hidden, surf anonymously, secure all the protocols on your PC, provide full encryption of your activity while working in Internet, and much more.

Get Platinum Online Privacy Protection. With Platinum Hide IP, you can surf anonymously, send anonymous emails through any web based mail system, access blocked websites or forums, get protected from any website that wants to monitor your reading interests and spy upon you through your unique IP address, etc. Your identity is secure, protected, and anonymized.

Platinum Hide IP allows you to select your IP location such as United States, United kingdom, France, etc. from the Choose IP Country window.

Key Features:

Anonymize Your Web Surfing. Your real IP is hidden when you surf on the Internet, keeping your online activity from being tracked by others.

Protect Your Identity. Anonymous web surfing enables you to prevent identity thieves from stealing your identity or other personal information, and keep your computer safe from hacker attacks or other risks.

Choose IP Country and Check IP. Proxy lists of many countries are enabled and you decide to select one country from the Choose IP Country window. You can check the current IP address directly.

Send Anonymous Emails. Send anonymous emails through any web based mail system such as Gmail, Hotmail, etc.

Get Unbanned from Forums and Blocked Websites. Change your IP address and then you can get yourself unbanned from any forums or other blocked websites that have ever banned you.
