Hey guys download final version of the Windows 8

VMDEPLOY - June 17, 2012, 12:16 am

Hi,
Seriously? Share cash links? aka filesups.

Also, Windows 8, I thinks it not final yet. The filename of the download is megakey.exe which I suspect is maybe a bot or something.

Thanks.

I been using this and its not all it is cracked up to be, and Radeon drivers are a big issue with windows big time having problems with it.

True, i'm not looking forward to windows 8... they really should have came up with some more features before deciding to try and market this.
and yeah, looks like a virus to me, But if you want to download make sure to upload to virustotal.
