ObjServe - June 17, 2012, 6:07 pm

I challenge you shitty hackers.

I challenge your shitty ass.

<http://objserve.org/Anonymous/>

Prove you're a legion, prove you can beat me.

You have no idea what you are doing accepting this challenge.

<https://www.youtube.com/watch?v=U-uV77vIPtg> -> my home made video on what I think about Anonymous.

Bring it on.

Anyone try it. I'll win.

Tidal Wave - June 17, 2012, 6:08 pm

Damn you made a statement here... :P

ObjServe - June 17, 2012, 6:09 pm

I'm not scared of some shitty like 10 year old hackers.

All they do is run tools made by other people and say they are a legion. Prove it.

WhiteFlame - June 17, 2012, 6:10 pm

Well I wouldn't have known that video was home made unless you told me. It looks like studio work.

__H__ - June 17, 2012, 6:14 pm

I could make a page like that easy, with no actual username or password that works.

And yeah, the budget for that youtube video looks like you had a large budget, definately studio work.

?Raw - June 17, 2012, 6:15 pm

& you're more superior because?

& challenge you at what.

ObjServe - June 17, 2012, 6:15 pm

There is a real username, password that works. You just have to figure it out, its not going to be easy. Hint: Encrypted.

Lol, do you really think those IPs are anonymous or that we just clicked on them because you posted a link?

ObjServe - June 17, 2012, 6:19 pm

Lol, that does not exist. "data.txt" does not exist. Keep trying.

If you were smart, you'd figure it out quite fast.

(Jun 17, 2012 06:18 PM)WhiteFlame Wrote: [\[CITE\]](#) Lol, do you really think those IPs are anonymous or that we just clicked on them because you posted a link?

Don't care. Simple IP logger to trace who does it, so I know the persons IP who got in to it. If anonymous is real, they won't care if there is a ip logger. They would use vpns, proxys.

You're proving a point Anonymous can't hack because you posted a stupid YouTube video and challenged an idea on a forums?

I agree with one of the previous posters. You seem to be 5 years old.

Be a bad ass somewhere else. xo

(Jun 17, 2012 06:13 PM)ObjServe Wrote: [\[CITE\]](#) How am I an idiot? For proving a point Anonymous can't do shit.

No because most of the anonymous are just little kids actually PRETENDING to be anonymous, anonymous is an idea which usually protests for freedom of the internet and shit.

And also if the real Anonymous hackers were that shit I don't think they would have been able to hack into places like PSN and keep them down for months.

ObjServe - June 17, 2012, 6:22 pm

I'm not 5, I'm much older then you would think. I'm just sick of people saying "I bet you Anonymous could hack that", ect. So I made this. I challenge Anonymous, hell I challenge all you hackers who think your good. Bring it on.

ObjServe - June 17, 2012, 6:25 pm

I bet you can't hack my script. Unless you're going to try to hack it then get lost. Not trying means you know you can't hack. So bring it on, hell, I'd be willing to bet \$ that you can't.

Cool. If you want to give up on trying since you can't win, then just stop, don't worry. There is a ip logger. It removes ips every 60 minutes(deletes + remakes new ip file).

Protip: Threatening people with an IP logger doesn't really scare anyone.

Also, the reason why no one can break into that login panel is because it doesn't actually receive the post data.

<http://objserve.org/Anonymous/index.php?login=username%3Apassword&submit=Login>

That's the default post data sent right? Well, why doesn't it give me a failed page?

I'll tell you why.

You made a login panel that is fake. No matter what is put in, it will always fail.

Your PHP file isn't even receiving the data sent, it's just saying "fail" to everything.

In summary, why did you waste your time creating something this stupid?

What is the point of this thread? It makes no sense posting on a forum that anonymous actually doesn't go on. Post on 4chan or their actual irc. Please do not make shit threads like this.

By the way, I hope your pop site is /Whois proof, also mitigated/DDoS-proof. I will be sending some traffic to it. :)

TmasLove - June 17, 2012, 6:49 pm

I'm not 100% sure, but seeing as you're the OP ranting on about Anonymous doing this and Anonymous doing that, we're supposed to be telling you no need to get angry. That's our line.

xhexs - June 17, 2012, 7:57 pm

i understand that you are trying to prove a point about hackers but this thread is pretty much asking for people to give you shit. if you dont fuck with anyone they normally dont fuck with you unless you have some serious shit.

the only thing i dont like about hackers is, just say i had the gamertag Joke. they would jack it just because its a nice tag. and i dont deserve shit like that, im a all around nice guy and didnt do shit to them. if you understand what im getting at. your really just asking for alot of people to attack you. not really a smart idea in my opinion.

Skiezo™ - June 17, 2012, 7:59 pm

I think i should see this thread as a joke.

For all we know he's doing some type of browser exploit drive by. This would most likely be the best spreading method ever if you ask me, you know how much attention is gonna get? I myself don't understand why, but think about how many people clicked that link... just think about it. Exactly, I rest my case.

Ontopic: The 'real Anonymous' aren't a group. It's a way of thinking. Sadly, the thing about a thought is, anyone can claim to share it. Including idiots. It's like being Christian. Yes there are some people who actually believe the religion then others who are just like 'lol what your a fucking faggot'

Vinnie - June 17, 2012, 8:04 pm

My post got taken down LOL, seems legit. I'll posy nicely now. This member is a skid.

can you stfu with your butthurt self and anon hate? who gives two shits about anon, no one gives two fucks if you love or hate them. And why do people always use the name of anon? If you know classic movies the reason should be right under your nose:

"I am not the Dread Pirate Roberts."

SIM-1073426 - June 17, 2012, 8:21 pm

The moment when a skid is flaming skids. Might as well get some popcorn. So, OP. What made you think your the biggest hacker of all so you can flame this forums member and a group of hundreds of people? Made a batch script that pings google? :o

Neket110 - June 17, 2012, 10:13 pm

Lol Anonymous is not a group.... And they dont have a leader. Anyone can be Anonymous. I am Anonymous. Now i am not Anonymous. It's so simple.

??¢??? - June 18, 2012, 12:56 am

We are anonymous

We are legion

We have better things to do than to prove ourselves to a 9 year old asshole by haxing his fake IP logging shitty website.

NeoCom. - June 18, 2012, 2:24 am

Anonymous might be a shitty team.. some of them are very experienced though.
The challenge you just made will of course never be accepted..

Not even a Moran would bother to read this.. I wonder why i did :D

Very low quality post!

ObjServe - June 18, 2012, 5:00 am

i think you are going to be a dead men XDD

ibaijc - June 18, 2012, 5:25 am

Look kid, you are not better than anyone else her. Ok some people that participate in the Ops ran by Anonymous might be inexperience faggots. I agree with that. But you some of the participants would amaze you with their abilities. You cannot just go around a forum that you just signed up at and start being an unoriginal F*** about a group/legion/idea that you have not documented yourself about.

They help to make things fair in less developed or unfortunate countries and this is what you do ?
Just post some BS about them ?

People like you should be put into a cage and thrown into the ocean.

Thank you and have a good day!

Do0ks - June 18, 2012, 5:30 am

wow bro. look at you dropping your balls... Although doubt anyone "from" anon gives two shits what you think. If anything this it a failed attempt to get liked

Snapback. - June 18, 2012, 5:37 am

i mean Anonymous isn't really a group bro, its an idea or a way of life. I mean most people who say they are Anonymous hackers aren't really hackers, they are just trying to seem cool. I see your point in a way, but this thread isn't the right way to go about it. You can have you opinion which would have been better than having the entire HF community hate on your thread, and neg rep the shit out of you. lol
