Thread: [\[TUT\]How to DDos with Darkcomet RAT \[TUT\]](#)

uglykidjoes - June 18, 2012, 10:53 am

How to ddos with darkcomet,

just a quick tutorial on how to ddos while using darkcomet rat.

- 1.open cmd
- 2.in box type ping [www.siteyouwanttoattack.com](#)
- 3.locate ip number eg 113.132.56.9
- 4.open darkcomet and highlight as many slaves as you want obviously the more you use the stronger the attack and then follow picture in the spoiler to find ddos area and choose what sort of attack you want to do.
- 5.darkcomet then asks for the ip and port for this tutorial ill be using example ip and port 80. so in DC type in box 113.132.56.9:80
6. DC then asks how long to attack with 0 been unlimited dont go mad just use 60seconds for testing .
- 7 visit [www.downforeveryoneorjustme.com](#) and type the sites name and it will say weather its down or not.

like i said just a quick tutorial on this as i only found out you could do it the other day so i thought id post it so others like me who didnt know that darkcomet can dos and not just been used for the norm.

Spoiler [\(Click to View\)](#)

tezz - June 18, 2012, 10:55 am

Lol I really don't wanna flame but 98% of DarkComet users knows this
edit:btw to take down a website you must use http flood just saying

uglykidjoes - June 18, 2012, 10:57 am

(Jun 18, 2012 10:55 AM)tezz Wrote: [\[CITE\]](#) Lol I really don't wanna flame but 98% of DarkComet users knows this

i didnt till other day lol and i dont see a tut on here about it so i thought id post one. everyone gotta learn from somewhere i suppose

ProductiveHQ - June 18, 2012, 10:57 am

Thanks for reminding me for this :P Because sometimes it just runs away from your brain :D

uglykidjoes - June 18, 2012, 10:58 am

edit:btw to take down a website you must use http flood just saying

i used syd flood and it took down a few forums (small ones) and i only used ten slaves

about50 - June 18, 2012, 12:06 pm

wtf, how did I not think of this before...

MuffanPancakes - June 18, 2012, 12:59 pm

Thanks for the idea, gonna try this out once I get a RAT installed on my friend's computer for a joke.

Also, just noticed you have Club Penguin in your bookmark bar. Fucking lol'd.

uglykidjoes - June 18, 2012, 11:41 pm

No problem bro and there's nothing wrong with a bit of club penguin.

hacker137 - June 19, 2012, 10:42 am

sir, how many bots should i have to take down a pretty secured college website?

xcod3r - June 19, 2012, 11:44 am

OMG seriously why would you post a tutorial on this... if n e one had n e common sense they could just do it... its a feature already built in DC... no sense in making a tut on it lol

uglykidjoes - June 19, 2012, 10:27 pm

(Jun 19, 2012 10:42 AM)hacker137 Wrote: [\[CITE\]](#) sir, how many bots should i have to take down a pretty secured college website?

Trial and error so try ten then twenty then fifty and just keep trying but it all depends on strength of site and the capabilities of your slaves

Maltego - June 23, 2012, 10:57 pm

sir please m new to this ddosing

please i cant understand this:

- 1.open cmd
- 2.in box type ping <http://www.siteyouwanttoattack.com>

help please

uglykidjoes - June 23, 2012, 11:24 pm

- 2.in box type ping <http://www.siteyouwanttoattack.com>

help please

Press start button on desktop and in search / run box type cmd and press enter. A little black box appears on screen. The say you want to attack Google. To get Google's IP number you type in black box ping WWW.Google.com and press enter again and you will see Google's IP on screen. Its the long number.

matta_tim - June 24, 2012, 1:07 am

Dude I LOVE your tuts . If i was 1337 bro id give you REP all day :)

BIG THANKS!

crazy dave 1776 - June 24, 2012, 1:38 am

hey joe thanks for posting this! I knew you could do this, but this just made my life easier when it came to finding it :)

jenat - June 25, 2012, 3:59 am

how long will it take to down website ? 1 hour or 4 .

How can we do this anonymously ? If we do with own ip , anyone can track us ?

uglykidjoes - June 25, 2012, 5:42 am

(Jun 25, 2012 03:59 AM)jenat Wrote: [\[CITE\]](#) how long will it take to down website ? 1 hour or 4 .

I used fifty slaves on a forum and it was down in less than a minute. and as you are using other people to attack with only they can be traced. Unless they are really computer savvy then u could still be traced but still use a vpn when using rats that's mandatory anyway

uglykidjoes - June 27, 2012, 10:21 pm

help please

Open command prompt from the start menu then in the box that pops up type ping

www.lcfghghh.com to get its ip.

uglykidjoes - July 18, 2012, 12:31 pm

showing how this works <https://hackforums.net/showthread.php?tid=2690308> taking request now

Dialgan - July 18, 2012, 1:14 pm

Thank you very much for this info mate, i didn't know darkcomet supported this option...

I can also bring home connections down with this, right?

uglykidjoes - July 18, 2012, 1:16 pm

You can use any of the features bit you will need to find a open port for other than HTTP

kmvl2004 - October 22, 2012, 1:51 pm

This DarkComet DDoS Function is not so hard hitting... LOL sorry.

But yeah, It depends on how many slaves you use. ;P

uglykidjoes - October 22, 2012, 10:33 pm

(Oct 22, 2012 01:51 PM)kmvl2004 Wrote: [\[CITE\]](#) This DarkComet DDoS Function is not so hard hitting... LOL sorry.

Yes it all depends on how many installs you have but I've downed small sites with only 5 installs and with nearly 1000 installs to my name I can down quite a lot

Real-Hackers - October 23, 2012, 2:03 am

what if want to ddos a IIS server ???? its it possible to do so ? if yes then please PM me

Karaexia - November 25, 2012, 8:43 am

Whenever I do this my slaves disappear out of my list. Is this supposed to happen since I'm using all their internet for the attack?

Really sorry for gravedig, but I needed to know.

RO-VPS - November 25, 2012, 9:44 am

Is this normal? My Vics disssconnected for over 20 minutes xD

Di?mond - November 25, 2012, 10:19 am

This is pretty easy to figure out, but I hope it helps some people that are just now starting to use Dark Comet.

uglykidjoes - December 27, 2012, 12:57 pm

thanks and yes it was aimed at people who are new to this sort of stuff

Lord Murakami - January 31, 2013, 3:29 am

how many slaves usually needed to take out a home connection for some time ?

kevin14256 - March 20, 2014, 10:10 pm

Holy SH*T had no clue about this thank so much for the share bro no I really want to spread my rat!!!

uglykidjoes - April 19, 2014, 8:24 am

(Jan 31, 2013 04:29 AM)Lord Murakami Wrote: [\[CITE\]](#) how many slaves usually needed to take out a home connection for some time ?
for a home connection id say five installs and it will stay down for aslong as you want really , that and how long your installs your using to attack with stay online

--Alexander-- - April 19, 2014, 12:47 pm

nice share thanks alot ,,,,,,,,,,,

MrDomo - May 26, 2014, 10:15 am

Thank you for this Tutorial :) ?

sploogeflake - April 20, 2015, 3:27 pm

Hey where is the download for Darkcomet? i need the download but i cant ever seem to find it :P if someone could give me a mediafire link or something that would be amazing!

uglykidjoes - April 26, 2015, 4:27 am
