Thread: [Unable to connect to database server.--I will pay you if it gets fixed!](#)

Bricktober - June 19, 2012, 12:43 pm

I need some help, im trying to get my site up and running as I had taken it down a few months ago and it worked fine, now I am trying to put it back up but I keep getting the following error:

Unable to connect to database server one.

What should I type in so that I can make it work?

homemadejam - June 19, 2012, 12:46 pm

PHP Code

```
<?php  
mysql_connect("localhost", "collin_collin", "PASSWORD") || die(mysql_error());  
mysql_select_db("collin_first") || die(mysql_error());
```

That should do the job.

Just make sure you replace PASSWORD with the actual password for the database for the user: collin_collin.

ĐÑÅ™ - June 19, 2012, 12:47 pm

Database name: collin_first

Username : collin_collin

Password: whatever your password is.

Database server/host: localhost unless the hosting company gives you something different

Bricktober - June 19, 2012, 12:53 pm

None of that is working, ive pmed ^ to see if he can help via teamviewer. Any help is welcomed.

ĐÑÅ™ - June 19, 2012, 12:54 pm

Im connecting now please bear with me

homemadejam - June 19, 2012, 1:01 pm

What errors are you receiving?

If you used the || die(mysql_error()) at the end of the mysql_connect & mysql_select_db statements, just post the error that it displays.

ĐÑÅ™ - June 19, 2012, 1:31 pm

Yo accept me on skype, I've sent you a request.

Your website is fixed :) Nice website

Bricktober - June 19, 2012, 4:26 pm

Website is fixed, im currently sending our payment. My bank is making me clear it though.
