Hello Everyone.

Long time ago i bought lifetime for icropt.

I stopped with ratting & those stuff i went into graphic designing. But now im back into ratting and i see the crypter is still online but.

When i pm ASM for the updated version he never reply's

What to do ?

Give it another week or two then make a scam report.

I thought iCrypt isnt as good anymore as it was oversold which meant shorter FUD time. Good luck trying to get a response from ASM though!

P.S If you are unsure of whether or not to start RATting, yet dont want to pay up to 20\$/mnth, maybe buy credits to cloudcrypter.net so you can test the waters

ICrypt died a long time ago. OMC just started a new crypter. I'd suggest posting a scam report if you still have payment proof.
