Can I get this please? Got charged back \$95 yesterday. Hurry if you can :)

Do not buy this. If you are a seller and you want to win a chargeback, this is a waste of your time.
All it provides is information on how to scam someone as a seller.

If your looking to learn how to scam using virtual items, feel free to buy this. Otherwise, look else where.

"Also, if you are the seller and you want to scam" - From this eBook. Waste of my money. Also, change the title to "How to scam using paypal"

You can never win the dispute. I am challenging you to test the legitimacy of your method. If you say you will open a scam report, it certainly means your method doesn't work, that's why you aren't confident enough.

If you win the dispute after I chargeback, I'll pay the money again.

You think your getting me to bend over backwards by challenging the legitimacy of my method. Im more than happy to sell you the book, however should you choose to chargeback Im telling you what's going to happen. Since you say im not confident enough, I encourage you to buy the book, and should you choose to chargeback see the scam report filed against you.

Im leaving the decesion into your hands, and your hands only. You can do what you like by "trying to prove my method for kicks", but in the end you will lose. Just becuase you have an outrageous number of posts does not mean I need to prove anything, lest to you.

An Update. Since I cannot change the layout as im not a paying user, ill have to say it here. The Ebook has been updated and is now going on 8+ Pages.

Sorry for such a long delay. Old users can PM me with pp info to receive a updated version.

The book will be out within 2 weeks. With over 129 copies sold, this is the most successful and helpful Paypal book on hackforums.

False advertiseing on your sig.. saying

~Click~ FREE How to win ALL your Paypal Disputes FREE ~Click~

I even told you days ago and you told me its not free its \$3 yet you have not changed you sig.

Nerdi - November 14, 2013, 12:34 pm

I'm pretty annoyed that your signature has the words 'Free' next to the link to this guide.

Your signature is a complete lie. It's not free. We have to buy the guide...

So this makes me think you're capable of lying about other things too.

Just curious - Can someone vouch that his guide is 100% of what the title says it is because right now I'm led to believe that it's a rip off and not as described.

I will when I update it again. Researching and testing more methods right now. By the time I release, it will be worth of buying resale rights!

Thanks
