Why you?: Because I have always wanted to be part of this group but never had the money to do so. I think i am perfect for this group for many reasons. First, I absolutely LOVE RAT's and RAtIng. All of the methods, social engineering, all of the process. I can help any new people to RAtIng on setting it up and getting the first few slaves. I am also somebody that elaborates on things, somebody that doesn't just say "Good job! 35char" I would say something like "Great share! Mind sending me a bit of the source to see if I can improve it?" I only post on things I KNOW about and don't feed the trolls. If you know what I mean by that. Last I am perfect, because I am on hackforums everyday for about 3 hours. I am on the computer almost all day now since it is summer. I will probably donate to blackshades later on once I get some money. I could run great services such as rat setups, spreading, etc. I've made a lot of money in the past its just that paypal limits me. I will try and help every single one of the group members with what ever they need. I have around 500 post in the rats section and making more each day. I'm about on 24/7 and helping people. Like I said not just on the forum also on skype and other forums! People are always happy when I help them, I get the job done and give them some tips and tricks they could do. Once again I wanna thank you so much for reading my application!

Why do you want to enter?: I think I am good for the group because I am a kind guy, I am not horrible to everyone, I can help people when they need the help the most, I think I can provide a lot of good things which are free and just a lot of things, I hope I can get into this group to share some nice things I have which I would really would like to. I have been at Hackforums for quite some time now, In this time i have learnt a lot of things from the fellow members ,and i have imparted knowledge to those who needed help , I have good knowledge in RAT's , I am good at spreading, I am learning to code. If i can get into the group then i would be able to expand my knowledge about RAT's and other things .I work very hard whether it is about teaching someone or learning from someone. Also i would like to be friends and have discussions with like minded people. I would enjoy being in the group.

Also I have done many giveaways contests:

I have done many giveaways to help people, including free accounts, bots, money, crypting service, etc.

Why you?:

I'd like to keep this all pretty short. I would like to be in this ground because I have always wanted to be in a group. Not only for access to all new products but to be able to be open to a new community. Would be great to be a part of something on hackforums seeing as I am not yet in a group.

Why do you want to enter?:

I would like to enter because I have seen what this group provides all over the forum. Not only do they offer amazing products, but around the forum the group represent themselves with a friendly

and high quality attitude, something I would love to be apart of.

Oats??? - June 21, 2012, 3:36 pm

Some background information about myself, although i havent been on hackforums very long ive been a long serving member on various other forums such as support forums and other unrelated sites to hackforums. I strive to be a high quality member and help others and also have my ways of having fun such as black hat methods. Within hackforums i have created various giveaways to help the community and a help desk for any support related to minecraft. I also run my own stress tester which is going running very smooth and is quite successful.

The reason im applying for blackshades is because i have heard many good things about this group and would possibly like to experience this myself. I taught myself to use certain RATs since i joined the forum and i would say im fairly good at it, especially with the SE side however i cannot discuss that here. I would love to learn more techniques and ways to spread your server and possibly start another helpdesk rat related and beleive it would be a great place to start within your group.

Why should you pick me above the others? Well there is no other reason to pick me above the others however i beleive im a very high quality member who could bring a good name towards your group, i act with maturity 99% of the time and have a consience to help others. I also have the intentions to learn more about the subject. Although this application is fairly short i will possibly be adding to it tomorrow.

Also i know i do not meet the requirments but hopefully i should receive the postcount soon.

Why you?

I'm a 19 yearold gamer, I've been wanting to learn how to code and rat for quite a while.
I actually have been wanting to learn how to RAT and Keylog and various other blackshade stuff for quite a long time. I feel that this would be a really boost in helping me do so. I also feel that as a rather HQ and active member, that I could help the group quite a lot. :-)

Why do you want to enter?:

Pretty much what I said above. I really do feel that I would really gain from getting in this group.

I do not want in just for the userbar.

Well. Oats has got it. Damn it.

1Time - June 21, 2012, 3:52 pm

Why you?:

I have been active in RATting for quite some while now.

I am common with all the functions and I love to fool around with my slaves and build up a database of mail accounts / game accounts / website accounts etc.

I think I'd be a great achievement for BlackShades. I'll be active on the forums and share my experiences with RATting.

I also want to learn a lot more about the whole concept of RATting and related things.

My posts are mostly HQ and my English grammar is awesome!

It would be nice to build up a stable slave network and do RAT setups and give out test installs.

Why do you want to enter?: I'd like to enter because I love to have a chance to join BlackShades of course.

BTB™ - June 22, 2012, 11:15 am

Why you?:

I am in to Technical Support for the past 10 years. My forte is providing DSL support to the US clients. And at times it was like using our Remote Administration Tools only. Obviously, those were protected in the office. But, I have an inner instinct to solve technical issues and my keenness to learn has taken me quite far. I love to solve technical issues on Windows Operating System & the third party programs installed on it. Would definitely like to add that I am a smart Google searcher that makes my task real easy!

Why do you want to enter?:

As stated above, I am a keen learner. I will not say that I would only join just to give/spread the knowledge I have. Rather, it would be both ways. My motive will also be to learn from the existing esteemed team of Blackshades. There is nothing like spreading our knowledge & this is what the mission/vision statement of this group says too!

Thanks & Regards. ?

Lion™ - June 23, 2012, 10:15 am

Looks like not a lot want in, will choose the winner soon!

BTB™ - June 23, 2012, 10:23 am

Would like to wish Best of Luck to all the participants!

If I get in, it would be a great learning experience for me ?

In no less than 250 words, what about you makes you perfect for the group?

Well i could write about 2 pages article why i should be accepted. Well the basic reason is that i am good with Remote administration and actually it's the thing i feel i am best at[than my other abilies].I have been doing it for a long time and have helped other's set it up too[check my rep coz i can't post every name].This is the perfect group for me as i am good in remote administration and hacking tools,as niether can i code nor i do gfx? .I have also developed good knowledge in these topics from HF only before then i was limited to keyloggers and stealers only?

But now i know how to make Rats work and how they work[their functioning]

So it will be my opportunity to get in this group

I agree that I do not have any open scam reports, I have not applied within the waiting period, and I have not lied on my application.

Posting the Application only.
