Thread: [\[REQ\] Graphic Designer - Massive Req \[REQ\]](#)

Proposed - June 21, 2012, 4:12 pm

Hey, I'm currently working on starting my own forum and have terrible graphics skills. I understand CSS, HTML, Java, DHTML fluently but I will go nowhere without proper graphics. I'm looking for a individual that will be willing to provide me with full website graphics. I will need all new graphics for the forum including but not limited to; Userbars, Header/Footer, Post Indicators (Ie. New,Old,Hot etc.) Custom Content Boxes, and many other graphics upon request. This job will NOT be paying but I'm able to offer exclusive usergroup, userbar, and a few other things we may discuss. If you are interested please send me a PM or reply below. I would like to see some previous works before I will think about accepting you. If I'm interested I will explain the forum a little bit more and in-depth. If you have any questions let me know! Thanks in advance!

I could lend a hand in this project :) It'll be a fun learning experience! <3
Maybe you can even teach me some languages to help me make my website :)

I would totally be willing to do this! The main basic ones are what you're going to want to learn such as CSS and HTML. Extremely easy once you get started! PM me and we can discuss more!
