Thread: [\[Tutorial\] IPv6 RA DoS tool on android \[Tutorial\]](#)

EmperorDAZ - June 22, 2012, 7:04 am

Hello hackforums community, this will be my first tutorial and contribution and I hope that you guys will find it useful and that I have posted on the correct section lol.

Enough talk. Let's go to action.

I hope you guys enjoyed this. ?

[PS: Sorry if the links aren't very visible]

dicking - June 26, 2012, 1:04 am

It says CD not visible...

Could you please AIM me? and help??

No, on the PuTTY part,

It says can't cd to sdcard or
can't cd to debian

it won't cd to anything.

cd /

first? Send me a screenshot so I can see what's going on.

Did you made a new folder at the sdcard named "debian" (without quotes) and extracted BOTH [.zip] files to there?

Friedrich Schiller - June 27, 2012, 7:21 pm

Well, looks like I just need to buy an android phone.

EmperorDAZ - June 27, 2012, 7:31 pm

You don't need to. You MUST buy one.

I plugged my phone up to my computer and made a new file called "debian".

Then I extracted both of the zips and I opened the files on my computer..

Then I put.

debian.sh inside of the debian folder.

and put.

debian.img

in there...

I have a file manager on my phone but I'm not quite sure if that matters or not.

very strange... Go to PuTTY, do cd / then do ls . Post the screenshot of the output here.

xSpectrex - June 27, 2012, 8:26 pm

Very nice tut man. Very well done. :) Keep up the good work!

dickinq - June 28, 2012, 11:51 am

There's the screen shot of me doing.

cd /
then
ls...

That's what popped up.

Mind doing cd /, cd sdcard then ls? I'm pretty sure you may have renamed the debian folder incorrectly.

Prominent - June 29, 2012, 11:24 am

Looks like one hell of a tutorial if you ask me, on an interesting topic indeed! Good job!

EmperorDAZ - June 29, 2012, 8:47 pm

Thanks. I found out that there's not much tutorials about android around here and since I sometimes "port" some stuff to it I thought why not showing to people the power of android?

Fa-koff - September 4, 2012, 8:03 am

The image is completely unreadable on my Android phone, no matter which browser I use.

Too bad.

EmperorDAZ - September 5, 2012, 4:17 am

What good is an ANDROID tutorial if it's inaccessible to an ANDROID device?

Which versions of ANDROID does this work with? 2.2.x > ?

Does the device need to be "rooted?"

EmperorDAZ - September 24, 2012, 11:16 pm

Does the device need to be "rooted?"

Isn't it mentioned that it's not RENDERING properly? My phone and some others renders fine. 2.2.x and whatever that the application Botbrew supports, which should be many.

I suppose you weren't able to read the image because it didn't rendered properly to you.

IBladeZ - June 8, 2014, 8:25 am

Nice tutorial its really working thankyou!

?Solace - June 9, 2014, 6:20 pm

Amazing guide. Deserves a sticky in my opinion :)

cmind - December 21, 2014, 4:44 pm

thank you really very much i found the tutorial very helpfull and detailed i really think i will use it :D
