Thread: [504 Error](#)

? Mark I. Mcclam ? - June 22, 2012, 2:22 pm

Hello, for the past week i couldn't access HackForums because i keep getting 504 Gateway Timeouts when the ip range is not blocked...

i am wondering how to prevent this from happening aging

Note: I dont have a ISP i am tethering with T-Mobile ranging from 208.54

McFlurry - June 22, 2012, 2:39 pm

You could be firewalled. Please read this: <https://hackforums.net/misc.php?action=help&hid=19>

Hexicidal - June 22, 2012, 2:51 pm

This is because the mobile network itself is connecting via a dynamic network. When on my mobile I become firewalled sometimes. It happens. Refresh it and it will usually work.

Z?us - June 22, 2012, 3:23 pm

504 Gateway Timeouts it explains itself.

It's on your phone careers side of things, you can't leave your N.A.T refreshing works or calling and bitching for better service would do it aswell.

Always check doing the following:Use different web browser

Empty Cache

Check if fire-walled

Try different network

Use the contact form to resolve the firewall issue.
