Thread: [\[FREE\] Free Services \(RAT/Port Foward\) \[FREE\]](#)

Muffin - June 23, 2012, 4:00 am

Hello, Its time I give back to the community, so I'm going to do a free service for all of you ?

[-] List of my services [-]

- Helping to setup a working RAT (darkcomet, blackshades, cybergate etc)
- Helping to Port Foward

[-] How it works. [-]

Post on the thread your issue, with this form:

Code Service you want:

The Issue you recive while trying on your own:And I will PM you with further details.

Thats all I guess.

Thanks, Muffin.

kbhgambler00123 - June 23, 2012, 4:09 am

I would love your help

thank you in advance

jidechase - June 23, 2012, 4:14 am

I will not mind if you can help me out bro i will appreciate it

Muffin - June 23, 2012, 7:40 am

Please use the form as above given, to identify your problem and help you fix it as soon as possible!
Thanks mates :)

?Pulsar? - June 24, 2012, 6:40 pm

-Helping to setup a working RAT (darkcomet, blackshades, cybergate etc)
I will Like some Help To set Up My RAT please

Thanks In advance

Black Aladdin - June 24, 2012, 10:57 pm

Code:

Service you want:i have a keylogger, i need help binding it, and crypting it
The Issue you recive while trying on your own:dont know where to start
If you can, thanks

Skiezo™ - June 24, 2012, 11:04 pm

Nice service you're offering here sir
Hope you do good.

muzammilshadab - June 25, 2012, 8:32 am

I would love your help

thank you in advance

SaschaaBD - June 25, 2012, 8:47 am

Looking nice. But i need help...

People see my JDB website, see "Run", click on run, but i cant see them in my server.
But my RAT is still working, without JDB. And for me is JDB Working please help!

For the fast help please:

kieron606 - June 25, 2012, 10:15 am

Service you want:RAT Help

The Issue you recive while trying on your own:I don't receive any connections

xx claws xx - June 25, 2012, 10:18 am

Service you want: RaT help

The Issue you recive while trying on your own: Someone said they gave me 50-60 slaves, and I didn't get them..

Muffin - June 26, 2012, 4:00 am

I about 3H, i'll start PM'n guys who actualy didn't troll the service. Claws, this service is for helping Rat connections, and port foward setups. I dont crypt files for now.

The Zodiac. - June 26, 2012, 4:01 am

Service you want: Portforward..

The Issue you recive while trying on your own: Ports have closed for no reason?

ijskar - June 26, 2012, 6:04 am

Service you want: RAT help

The Issue you recive while trying on your own: When I get a slave and he/she restarts pc somehow it doesn't start the stub again while I've put the stub in his/her startup folder.

-Akela

Muffin - June 26, 2012, 6:58 am

ijskar thats cause' the stub doesn't have a persistance/startup option. you can add it on the rat, and re-rat the person.

Elkern - June 26, 2012, 7:02 am

Do you do Test installs/Crypts mate?

garryd2011 - June 26, 2012, 7:20 am

Service you want:RAT Help

The Issue you recive while trying on your own: i have it setup the way it says but when i make the .exe i test on my self an nothing comes up :/

Muffin - June 26, 2012, 10:08 am

Pm'd all with my contact so we can figure whats the issue and fix it!

hochi72 - March 28, 2014, 12:10 am

Service you want:Rat help (I think smth. with no-ip)

The Issue you recive while trying on your own:

Server doesnt connect. But i forwarded the ports so I think it is a problem with no-ip.

hezzy03 - April 6, 2014, 8:16 am

Service you want: I've got darkcometRAT installed and it's on right now

The Issue you recive while trying on your own: No clue what do from here :)

HAHA!

I think the laugh is on me...as 10 minutes after downloading and installing darkcometRAT I've got a box on my screen, complete with music and a profile of some dude with his gmail account and I can't make it go away.

HA...I'm thinking this computer is now toast!

And I better log on from some other IP address and change every password I have :)

billybobzz - April 6, 2014, 7:12 pm

Hello

when using Darkcomet rat i can not see the serve when launched in sandbox or on my other pc.

also when i ping my no ip DNS with my regular static ip i get a reply as i should.

when i use my vpn the ping no longer works & when Duc updates it pulls a new ip every time when my vpn only supplys a new ip at login.

I am new to this so i am sorry if my mistake is basic, any help appreciated. Thank you. ?

EDIT: apologies for posting on the old thread. my mistake!

36 Chambers - July 11, 2014, 6:16 pm

i really need help if you could help me at please pm me or add me on skype at rydog110 i would appreciate it alot

Dr Pernix - July 11, 2014, 9:01 pm

My port needs to be open for DC and I have not updated dc for a while since I got a new router, can you help me please

Service you want: My RAT crypted

The Issue you recive while trying on your own: Razor Crypt is crap and I don't have any more money

Thank!

nabuushaman - July 12, 2014, 5:15 am

Service i want: Got problem with RAT, i've did everything right, port forwarded sucessful, set up sucessful, and still not working, i sent it to my friend for a test and when he ran it he never showed up in my slave's list, why is that? We thought its AV and Firewall so he shut both down but still, not working, i even crypted it and tested it, it was like 1/34 or so detected only, so i cant seem to figure out where am i doing wrong?

The issue you receive while trying on your own: Can't seem to find out where did i go wrong, since i followed every step there is and did everything the same as said on guides here on hack forums, if you could, add me on skype, got mic so i can talk to make it easier, skype is beezyan, thanks in advance

ohw1337 - July 12, 2014, 5:28 am

Service I want: Set up my RAT (DarkComet) properly

The issue you receive while trying on your own: Got the Server to connect in local mode, but struggling with connecting over the internet.

Ports in my Router are forwarded and open. I've set the right ports in the client and the server. Can't see where I went wrong :(

niemamnicku - July 12, 2014, 6:45 am

Service you want: I can cofigurate all but my administrator block all ports and i looking a bypass for this No-ip not workich with my VPN ;/

Service you want: DarkCommnet Setup

The Issue you recive while trying on your own: Everything

PolowThe - July 14, 2014, 3:29 pm

Hi dude :)

Service you want: Help me to setup my rat.

The Issue you recive while trying on your own:

In Darkcomet, when i use 127.0.0.1 and 1604, its work fine. (When i try on my own computer)
But, When i use a dns like no-ip, dnshdynamic.org, my slaves doesn't come in "Users" but they come in socket/net <http://prntscr.com/42pty1>

I Try with cybergate, and its similar : <http://prntscr.com/42pu9k>

I really need some help, I already use RAT, and i haven't got any problem before

Sorry for my bad english

Exs0dious - July 14, 2014, 4:32 pm
