Thread: [Skype hacking or freezing question \(mainstream question\)](#)

destructobg - June 23, 2012, 7:54 am

Ok so here is the deal there is some retard in a skype chat that thinks he is really cool so he non-stop changes the let's call it posts i make there. So i want to freeze his account for a joke to scare him and then unfreeze is it possible or to get his password somehow ? I know it is really mainstream question and i have read a lot of threads about it but they are all old and don't work :D

Skype freeze, password:

You can't freeze his skype client with an easy method.

You can't just "get his password".

If you want to steal a password, you can infect the victim. You can use advanced methods if you're experienced.

killer55755 - June 23, 2012, 8:06 am

You could just block him from skype...

destructobg - June 23, 2012, 8:15 am

Well i didn't mean it to be easy. And yes killer I can still do that but i want to stay in the group chat where HE is the creator and non-stop does idiotic things like changing the things I write an stuff. And yeah i didn't want it to be really easy buuut ok if you say so i've got no problems and thanks :3.

Changing what?

Can you explain the situation?

When you write something like : "I like apples"(in the group chat) he changes APPLES to a swear word which is pretty annoying.

Does he change the text you write?

If you want to control him:

RAT

Keylogger

Exploits (Need to scan)

What do you want us to do?

There are no easier way.

No problem.

Be sure to protect yourself.
