Hey guys,
I'm thinking of buying a refurbished PSP.

Or

Which one is better? Thanks. ?

The PSP 1000 is soooo old, don't get it lol. PSP 3000 is a bit newer but don't expect any more games to be released on it.

I would get the 3000 if I were you.

3000, but I'd just save up and get something better/something. Even the PSP Go is still pretty good, and the size of your dick credit card.

Dude, the PSP Go sells in stores for \$100. I bought mine at block busters for \$100, put CFW on it right away and got free games.

Id say get the PSP Go and follow some guides to get CFW on it to run homebrew and such.

<http://psp.dashhacks.com/> <-- Great place to get started with PSP stuff, the scene has died down a bit but is still alive.

PM me if/when you get everything set up and want a good place for backup games, as the Go doesn't have a disk drive.
