stopping hacking and recommending being more careful than him.

take care ZB, let us know what exactly happend and how ^_^

Yes, I think this is true (sadly). :/

Nothing bad happened to Zyklon B, he's still out there, but he stopped hacking for many personal reasons, he did many things and he left with honor and respect and nobody should forget who is Zyklon B and what is he Capable of...

He could've at least explained himself in a better way / comment at this thread but whatever.

Hacking is like an addiction, so why he stopped hacking from one day to another ?? Why he doesn't proof that "the party van" isn't comming after him ?

And who is Zyklon B ?? Why respect & honor, for what ? He breached into websites and copy data..so what ?

In my world a person earns respect and honor when he done something big, like a development aid worker in africa or for another development country.

When he worked for the red cross and build a school in afghanistan etc. THAT people earns credit and respect. So don't use the words respect and honor in these context.

I'll hope he gets what he deserve for the criminal things he did.

Peace

Okay guys listen, Zyklon B and I were Partners and actually brothers, we used to hack all day together and we never gave a shit about anything else... Now I don't care what people are saying because none of them has any proof, trusted source or anything similar so please just don't say bullshit, all I do give a shit about is two things and I think you guys should also give a shit about nothing else except for these things:

1- I will be waiting for Zyklon B to come back, he will someday, all I know is that finally I will meet my partner again...

2- Until then I will make sure to protect his Honor and I will do anything to accomplish that...

Zyklon B, I know you're reading this bro, don't forget about us no matter what happens man, I miss you, I will be waiting for you forever to come back, take care brother.

It's not "Ultra Gay" we're family, we were facing shit together, look, you know shit, just stick to hacking random .com with people you barely noob and post your defaces here on HF that would be good for you...

Next time, read all the post before absurdly trying to attack me.

As for your message: I never deface, and I barely hack. Next time do your research first.

no one is disrespecting him. By stating the most obvious reason for instantly stopping hacking from one second to the other, no one is shaming him.

of course he was caught. he hacked government servers of the country he lives in. him being online on his account is no sign for him not being caught.

this is not the USA, people are not fukn waterboarded in extraterritorial torture prisons without open trial for jay walking.

jeez.

i just hope he is fine and things will settle quickly.

Lol caught because of you're DOX, don't think so. Zyklon was great we were always talking etc but unfortunately he didn't protect him self well enough for the level of sites that he was hacking.

1/100 ??? My knowledge in "how i stay protected against authorities" is much better then him ;) i have to say some people (zyklon) search the the fame..hack random targets that he find with some dorks and posts the data on twitter and all hack forum over the world. ?

Some other people doing "his things" and doesnt talk about it, maybe with one best friend, they are not searching fame to become the best (pseudo)hacker. These guys are reading in HF but behavior in silence. These people are SMART and have knowledge, so STFU buttlicker.

You know nothing about my skills, about me and my occupation & education. Just because im not posting hacks im a noob? Im a White Hat. I dont Hack. 95% of HF members are underage Kids who are wannabees like you and they think when they upload a deface.html or a shell they are pro black Hat hacker ??

Ridiculous !!!!

How you stay protected from authorities? You mean this is why you registered to HF with your real IP Address? Lol.

So you're saying there's people who hack 50 .mil in less then 60 days but they doesn't talk about it, hmm, good... Lol.

You are a White Hat but you don't Hack? Nice, I can see how much of a hacker you are... Lol.

Zyklon B or Me, or any of The Unknowns, never uploaded a deface.html or a shell, and am not a Black Hat... You don't even know what you're talking about. Lol.

Thanks for posting that, it was funny, btw, nice Smilies... Lol.

DiGiTaLGoD you have no idea what you are talking about. Think before you put finger to keyboard.

spectrum10 - July 25, 2012, 5:41 pm

Zyklon was a very smart guy. I wonder if he even got caught, if was as smart as he shown maybe he plotted all this and faked his arrest and is just lurking in the underground 0.o i seen many great hackers do this before and months later almost a year they will reappear on the scene :-> I hope this is what he is doing and all the talk about him being caught is false

Thats what i mean..you are a dumbass but i don't let you die not knowing ?

Spoiler ([Click to View](#)) I registered to HF with a chained offshore VPN and TOR.

One offshore VPN (hehe i dont say the companys, google yourself) on my PC and one in my Virtual machine. After im double protected from my chained VPN i open TOR and surfing and registering started. So... real IP ?? You or anybody else will never ever see a real IP from me....get it?

So you welcome for this (for you) unknown tip ?

All my PC's, Laptops or Tablets & external storages are encrypted with Truecrypt with a passphrase of more then 50 digits. So what ?

Yes, thats what im saying..why search the fame....for what ? Tell me ? When you hack into .mil sites you had proof to yourself that you are able. You can make a lot of money with that knowledge, write some applikations to security companys and earn a well payd job dude....thats the right thing.

I know you call yourself Gray Hats. But breaking into companys or .edu & .mil without permission ist

not GRAY its BLACK and its against the LAW in almost every country.

So btw. when i have some time we will see how "unknown" you are.

ps. @ 5NiP3R: When the adults talk the crumbs has to be silence..you are the perfect example for the 95% of unknowledged HF members !!

Wow nice, you use True Crypt LOL, oh wait, everybody does... LOL

We're not searching for fame idiot, you don't even know what The Unknowns were working for the whole 60 days so shutup.

And about the "Companies Stuff", LOL, is that all you give a fuck about in life? Money? Don't you have something you wanna fight for to make this world better? You're telling me that you're okay with the way everything is going on right now? Good for you then...

I'm the one who choose if I wanna help or fuck a company and I have my reasons for doing that.

We don't care what you say about us, we broke into more then 20 .mil site but never shared even 70 % of the data stolen or even defaced the main website or humiliated any of our victims, if we are "Completely Black Hat" like you just said, then we would have Shared Everything, Flamed the Victims, Made fun of The Companies and Defaced the whole shit.

And about the last thing you wrote, oh well, that was creepy LOL, I can't believe am even replying to such a skid like you.
