This is the Image I made with the mask+Dragon Ball Z style Hair. I'll use this a my Signature. What do you all think about it?

Reminds me of a Pineapple you would talk to out of insanity if you were stranded on an island..

Pretty easy feat, but it has a unique look, something about it I really like. The only bad thing is the texture in the hair.

The hair doesn't seem to blend in with the mask that well o: but other then that, looks pretty good (:

Actually couldn't help it... The Real hair of Gohan is Super Saiyan lvl2 was yellow. But had to adjust it with White mask. So, got fucked up.

My Idea was to give the Long hair of Super saiyan level 3.... But the White Mask & Yellow hair. Couldn't mix it up & ended with this. ?
