Web Development

It's been awhile since I've posted a service offering thread so don't be hatin'.

I code proficiently in HTML, CSS, Javascript, jQuery, and PHP & MySQL.

I've been coding in HTML, CSS, and Javascript for 6 years, PHP & MySQL for 5 years, and jQuery for 3 years.

I also do some Photoshop work; from signatures to sales threads, to web designs!

My own projects that are on the web are [SwapBolt](#).

I code:

Dynamic Websites (e.g. member system)

Static Websites

Design Templates

PSD to XHTML (Valid)

I don't code:

Phishing Websites or anything related

Illegal Tools

Web Stressers

Pricing:

I always do flat-pricing, so it depends on the project. PM me for an estimate.

I only accept PayPal.

Contact:

Skype: [ipokemon.coder](#)

2/3 projects. Available for work.

I am not accountable for what my coding service is used for.

Vouches:

Check my reputation as well.

I'm pretty sure there are some clean looking wordpress templates out there for free, so I would suggest going with those. I'm still new to integrating designs into MyBB and WordPress, so yeah.

Uhm, that would take a very long time to code and would be on the back burner no matter what other projects may come up.

Why are you interested in one? Pokemon is a pretty controversial trademark that money can't be made off of.

I checked that link, it probably got moved or deleted or something cause I'm getting a " You do not have permission to access this page. This could be because of one of the following reasons:" from that.

And @daniel: What part of runelocus.com are you looking at? The toplist?
