Thread: [\[RELEASE\] UPDATED! DIGITAL ADMIN_FINDER WITH EXTRA FEATURES \[RELEASE\]](#)

spectrum10 - June 24, 2012, 11:09 pm

Hello HF's i would like to release my admin finder coded in java for free. Its not just an admin finder it has many other features as well.

UPDATES:

[+] Have taken out the reverse ip feature due to issues and working on it now. The feature will be added when im finished and im also working on adding a much larger list of admin URLs to the list.

Features:

- [+] .php Panel scan
- [+] .asp Panel scan
- [+] .cfm Panel scan
- [+] Phpinfo scan
- [+] Nmap Single Target scan
- [+] Brute Force Attack on Panel
- [+] Http Forum Brute
- [+] Default Account check on Web Applications
- [+] Email Harvest
- [+] Proxy Auth. Brute
- [+] Mssql port 445 Brute
- [+] Mssql port 1433 Brute
- [+] Mysql Auth. Brute
- [+] Sql Injection scan
- [+] Ftp Auth. Brute

Known Bugs:

- [+] Currently working on reverse ip function, something is up with nmaps nse script. Will fix, and be updating soon.

Now to have the full features of this script, you must have latest version of nmap installed on your computer. This script uses some of nmaps .nse scripts to run the features. But just as important you must have Java Installed. Linux users shouldnt have a problem with this, but windows users need to Install Java if not already installed. Also Java JDK needs to be installed not JRE so remember this when your downloading window's users. JDK!!!

Nmap Download:

<http://nmap.org/download.html>

Java Download:

<http://www.oracle.com/technetwork/java/javase/downloads/index.html>

Java Code:

<http://pastebin.com/G2LdsKC0>

~1) Now copy and paste the code to a text file and name it Admin_Finder.java and save.

Remember you must save it as Admin_Finder.java

~2) Open cmd or terminal and cd to the directory you saved it in.

~3) Compile the java code with the command javac Admin_Finder.java

~4) After compiling you should see a Admin_Finder.class file, that means everything compiled right and is ready to go.

~5) Finally install Nmap, make sure its working by typing Nmap into your cmd or terminal and help screen will show, then cd back to your java .class file in cmd or Terminal and to run Script type java Admin_Finder

And there you go, you should see the main menu, I hope you enjoy. It may not be completely bug free but just by giving it test runs, it has worked fine for me. PLEASE, LEAVE FEED BACK, so i can better the script :) Enjoy HF's and have a good night or morning wherever you are lol And hat goes off to Dan for letting me borrow the Phpinfo list from his script & Logic for giving me the idea to use Nmaps power and add extra features.

Greetz: The r00t3rs, Team Digi7al

dawnofwar - June 24, 2012, 11:15 pm

Awesome job man!

You can tell a lot of work was put into this. Excellent to release it for free as well. Good contributions to the community as of late, quality member!

spectrum10 - June 24, 2012, 11:17 pm

(Jun 24, 2012 11:15 PM)dawnofwar Wrote: [\[CITE\]](#) Awesome job man!

You can tell a lot of work was put into this. Excellent to release it for free as well. Good contributions to the community as of late, quality member! Thanks for the comment and feedback dawnofwar! If i could rep, i would rep you know, very HQ member with good things to say always XD

Th3PonyWizard - June 24, 2012, 11:20 pm

So you imported the phpinfo finder? ;)

Excellent work & downloading it as we speak. Will have some fun tonight :3

KarSticx - June 24, 2012, 11:21 pm

thanks for the admin finder pack bro :)

Agent Raigar - June 24, 2012, 11:22 pm

Excellent work bro, please read my PM :)

oldman1 - June 24, 2012, 11:22 pm

Can we have a virus scan please buddy just to make sure thanks.

Agent Raigar - June 24, 2012, 11:24 pm

(Jun 24, 2012 11:22 PM)battlef13ld Wrote: [\[CITE\]](#) Can we have a virus scan please buddy just to make sure thanks.

You have source, why would you want virus scan? Kids these days... Plus spectrum is HQ, he wont post shitty things. Cheers. ?

spectrum10 - June 24, 2012, 11:27 pm

(Jun 24, 2012 11:20 PM)Th3PonyWizard Wrote: [\[CITE\]](#) So you imported the phpinfo finder? ;)

Excellent work & downloading it as we speak. Will have some fun tonight :3

Yes i imported it XD seemed like a nice feature, and thanks bro.

imafaggotk - June 24, 2012, 11:28 pm

This is obviously very HQ work good job man! Keep up the good work

spectrum10 - June 24, 2012, 11:29 pm

(Jun 24, 2012 11:22 PM)battlef13ld Wrote: [\[CITE\]](#) Can we have a virus scan please buddy just to make sure thanks.

Trust me you have source code in their and if you wanted to check for a virus or anything you could. But honestly i wouldnt waste hours of coding just to make a virus and it be detected on the first download, i want to make a tool that i can use and as well others.

(Jun 24, 2012 11:28 PM)Strick?n Wrote: [\[CITE\]](#) This is obviously very HQ work good job man! Keep up the good work

Thank you bro, hope you and everyone else enjoys the free tool :}

KernelMode - June 24, 2012, 11:37 pm

Thanks for the share spectrum. You always have good stuff to share. ?

spectrum10 - June 24, 2012, 11:45 pm

(Jun 24, 2012 11:37 PM)Fukkireta Wrote: [\[CITE\]](#) Thanks for the share spectrum. You always have good stuff to share. ?

Thanks for the reply bro :) enjoy! we will be working on more tools for you guys soon.

(Jun 24, 2012 11:21 PM)Mr.Krabby Wrote: [\[CITE\]](#) thanks for the admin finder pack bro :)

Your welcome bro, hope you enjoy :}!!!!

Th3PonyWizard - June 25, 2012, 1:01 am

Ugh, I'm having a weird bug here (After compiling and everything):

Quote:tr1xie@Equestria:~/Desktop/Digi7al\$ sudo java Admin_Finder.java

Exception in thread "main" java.lang.NoClassDefFoundError: Admin_Finder/java

Caused by: java.lang.ClassNotFoundException: Admin_Finder.java

at java.net.URLClassLoader\$1.run(URLClassLoader.java:217)

at java.security.AccessController.doPrivileged(Native Method)

Could not find the main class: Admin_Finder. Program will exit.

Cmd says you dont have the main class file.

"Could not find the main class: Admin_Finder. Program will exit."

Either you didnt compile, or didnt cd to the right directory bro :/

Dunning - June 25, 2012, 10:26 am

Well it creates the class file when I compile it and it's in the correct directory :L

spectrum10 - June 25, 2012, 10:30 am

(Jun 25, 2012 10:26 AM)Dunning Wrote: [\[CITE\]](#) Well it creates the class file when I compile it and it's in the correct directory :L

Did you save it right and everything?? the code isnt the problem. maybe got the right java installed :/

einbrettholz - June 25, 2012, 10:54 am

wow, amazing work. Ill try it on my linux box later.

high 5

lastwarning91 - July 9, 2012, 7:15 am

how to compile the Admin_finder.java i cant get it

spectrum10 - July 9, 2012, 1:37 pm

(Jul 9, 2012 07:15 AM)lastwarning91 Wrote: [\[CITE\]](#) how to compile the Admin_finder.java i cant get it
You have to install the latest java jdk. and if your on windows im not 100% sure how to do it, may have to look on google, bc i dont use windows. But you open cmd and move to the directory that you have the Admin_Finder.java saved and you type in "javac Admin_Finder.java" without quotes and it should compile, then to run the admin finder you use this command, "java Admin_finder" without quotes.

lastwarning91 - July 9, 2012, 2:58 pm

i have java installed on my pc but when i cd to the Admin_Finder.java and type javac Admin_Finder.java it says it is not a batch command

spectrum10 - July 9, 2012, 3:07 pm

(Jul 9, 2012 02:58 PM)lastwarning91 Wrote: [\[CITE\]](#) i have java installed on my pc but when i cd to the Admin_Finder.java and type javac Admin_Finder.java it says it is not a batch command

Alot of people have this problem, i forgot how to fix it though :p its not difficult, you will have to search on how to fix it.

Hi! Who can help me, "could not find or load main class Admin_Finder

Terrabot - *January 29, 2018, 10:25 pm*

This is a truly remarkable piece of software, may one day i dream of using such a great tool.

PaidOnlineSURveys - *February 14, 2018, 11:12 am*

Excellent job dude. HQ work. keep it up...

poopaloopy - *July 7, 2018, 5:29 pm*

Very cool man, keep up the good work!
