Thread: [\[SQLi\]\[Digi7al\]University of Nebraska - Lincoln\[Hacked\]](#)

**Ich**i - June 25, 2012, 4:04 pm

Hello everyone. Recently hacked the University of Nebraska to give them a little encouragement to fix their vulnerability. Hopefully they'll sit down and take the time to fix this ;P

I decided to share this with you guys. All hashes found are included and even a few were already decrypted.

All your team BLACKHATS

I can't think of anything corny and sarcastic to write more than quoting yourself.

Quote:????? ?INTRA ?? ?? ????? ??????

Or something like that, you know what i mean.

Thats cuz it is, but I know these guys and they know manual injection but if you think about it, its alot faster to do your dumps via sqlmap or something alike.

Your whole group should change their names to be like yours:

Ichi - Ni - San - Chi - Go - etc.

Nice work guys, not exactly my cup of tea, but impressive work.

Or something like that, you know what i mean.bish pls. The special thing about us, is, that each of our member has it's own custom way of apporaching situations and working with them, as each of us is special on it's own way. Some of us are Black-Hats, and some, like me, aren't. Do you see me doing dumps? Nope. In addition, your quote is irrelevant.
