I really liked your other challenges. So I was glad to see there you made a level 6.
It's really hard though. But ey, I like to get challenged. So that's cool.

Could I have a hint though?
When I put in a negative integer in the \$_GET['serial'], I get this message:
Code Lets see if you smart enough to bypass me! (:Can I get a hint on this one? Or do I have to figure myself? :P

Nice challenge. I hope I'll make it. Not sure though, as I haven't really done any blind before.

Edit: I hope the next challenge will be like level 5. I really liked that one, having to make a PHP script to complete was awesome!
