Good job, one thing i dont like is that it takes a while to update the textbox, thats understanding because it parses it from <http://www.xe.com>, but you should also make a statusstrip or something to show that its getting the information because i have no visual confirmation that its actually doing something.

Also: CheckForIllegalCrossThreadCalls = False makes me cry :(

Pretty usefull program.

I always look what's the exchange rate.

Thanks for this.
