Thread: [SkypeKit](#)

Yuuki - June 28, 2012, 5:07 pm

SkypeKit is a tool that utilizes Skype's COM API library to bring Skype to a whole new level.

This was made a while ago, so don't judge me over this coding. Useful source if you still want to understand the library.

SkypeKit Features:

- Mass Message - Message all of your friends at once
- Spam - Spam a friend a message however many times you want
- Spam all flags - Spams the entire list of flags to a friend
- Hidden Emoticons - A list containing every flag and hidden emoticon on skype
- Get User Info - Grab all the info of a user's skype profile
- Dump Self Info - Grab all the info of the current Skype profile you are on
- Avatar Flip - Flip your Skype avatar through all the pictures in a selected folder. This can be used to make your skype profile look attractive or even to make a moving avatar!
- Status Changer - Change your skype status
- Status Flash - Change your skype status between online and offline
- Change Mood - Change your mood (status)
- Mood Matrifixy - Have your mood be constantly changed to a random sequence of numbers and letters
- Mood Vegasify - Have your mood extend in and out in a vegas sign fashion
- Mood Count Down - Have your mood be a live timer counting down!
- Call - Call a user
- Call Spam - Repeatedly call and hang up on a user
- Display Name - Change your display name (I haven't done anything fun with display names since they don't update as fast as your mood)
- Screen Capture - Have your skype avatar be a live feed of your screen

(credits are not required if you use any of my code, but appreciated)

Application: <https://dl.dropbox.com/u/42089158/SkypeKit/SkypeKit.exe>

Download has been taken down. Source is deprecated anyway

VirusTotal [\(Click to View\)](#)

Has one detection, not sure what it's from. It's a false positive though, I don't own any tools that infects people. If it's a problem just download the source and compile it yourself.

I'll change it to just post, thought it would help keep track of who wanted it.

ScreamX - June 28, 2012, 5:11 pm

I thought that you were no longer allowed to have post here and PM me threads. Or was that just the free section?

Support. - June 28, 2012, 5:13 pm

Pming you now, thanks in advance.

Still don't understand why people post & pm theads...

Rikko - June 28, 2012, 5:13 pm

This sounds nice, can I get it? and thanks :-)

Dark Energy - June 28, 2012, 5:16 pm

May I get this? Thanks in advance!

Fatalz - June 28, 2012, 5:27 pm

Can i have this and possibly the source because im wondering how this is done :)

Gee19 - June 28, 2012, 5:35 pm

Would love to see the source :) Would be cool to add some of the features to an app I've been working on.

?Mephobia - June 28, 2012, 9:27 pm

Hey can i get the source to this? thanks! great share!

???? - June 29, 2012, 12:56 am

Please send me this,

Thanks in advance~

nrd - June 29, 2012, 1:04 am

i would like to have the source, thanks in advance
just wondering do u pm us or we pm you?

Hullupingviini - June 29, 2012, 8:38 pm

May I get this? Thanks in advance! i really want test this

Bentley - June 29, 2012, 8:41 pm

Hmm, could I see the source please? Thank you :P

bomba123 - June 29, 2012, 9:41 pm

would like it can i have the source please?

Jash - June 29, 2012, 9:46 pm

hey man, id want to ask for the source, i wanna learn how you do that! thanks much!!

rsnerd - June 29, 2012, 10:16 pm

Hi can i get the source for this thanks in advanced :)

Stay Plural - June 29, 2012, 10:18 pm

Could I get this? Thanks in advance man, great program.

SkypeKit is a tool that utilizes Skype's COM API library to bring Skype to a whole new level.

SkypeKit Features:

Mass Message - Send a message to all friends

Mass Message [ONLINE] - Mass message all online friends

Spam Message - Allows you to send a set number of a message to any friend

Get User Info - Grabs a user's profile info into a copy and pasteable form

Avatar Flip - Have your avatar change through all the pictures in a custom selected folder at a set interval

Status flash - Makes your Skype status switch from online to offline at a set interval, very annoying to friends

Mood Matrixify - Have your Skype mood be constantly changed to random characters

Mood Vegasify - Have your Skype status extend in a Vegas fashion

Call spam - Call and hang up on any person on your friends list at a set interval

Screen Capture - Have your skype avatar be a live feed of your desktop

To get this post here.

The source is available, just ask for it.

VirusTotal ([Click to View](#))

Dang dude that is nice! Do you think I could get the source(I just want to check to make sure my login won't be sent to an email/database...

Raz3d - June 29, 2012, 11:17 pm

This is definitely something i could use. Looking forward to get a PM from you.

Jeff. - June 30, 2012, 3:51 am

I'm very interested in the source code so maybe that I could take a look at it.

Looks like a nice AIO for Skype :]

Local Celeb - June 30, 2012, 6:02 am

Mind if I get a quick gander at this? Looking to see how you did it all, and it probably could help me with live-streaming.

?Reath - June 30, 2012, 7:09 am

Can I get the source to this tool, please ? Thanks in advance!

Zyzz™ - June 30, 2012, 7:15 am

could i have this please? and if possible the source to! thx in advance! :D

tweety - June 30, 2012, 7:26 am

Does this use the Skype API? If so then this isn't really anything special. If it does not use API's then OP good job!!

V For Vendetta. - June 30, 2012, 7:40 am

Can I please get it? I would appreciate it! Thanks! :)

Vicious????? - June 30, 2012, 8:19 am

can i have this please? thanks in advance!

Injector - June 30, 2012, 8:23 am

I would like this

Im sending you a message

Sutton2k9 - June 30, 2012, 8:25 am

Don't you just use the skype API for this?
nothing to special if that is what you are using

Inmodwetrust - June 30, 2012, 9:32 am

I would love this! This look's fucking amazing, can I please have the source also?

Edit: This is fucking amazing! It's the best thing I downloaded in fucking ages, I'm having so much fun with it! :D Vouch!

D?de - June 30, 2012, 9:45 am

Can I get this please? If you are still giving out the source I wouldn't mind getting that. Thanks

Heisenberg Walter White - June 30, 2012, 10:12 am

May i get this?

May you pm me this?

thanks a lot

DeleteMyAccount - June 30, 2012, 10:15 am

can i have this plz n thanks man means alot great work

Junito510 - July 2, 2012, 12:34 pm

This is exactly what i was looking for pm me a link :D

Yuuki - July 2, 2012, 1:01 pm

Just going to post the links in the OP, I'd still appreciate it if you thanked me in this thread.

Fatalz - July 2, 2012, 1:33 pm

@op its a nice little program but you may wanna add some multithreading

Jeff. - July 2, 2012, 4:21 pm

I'm looking at the source code now and it's quite a good base source to learn from. Thanks again !

system32dk - July 8, 2012, 2:33 pm

I must say thank you thank you thank you are the best :)

camdenk1234 - July 10, 2012, 1:18 pm

This program is soo awesome <33
Can you PM me the source code?
Thanks :)

Yuuki - July 10, 2012, 2:34 pm

I posted the source in OP?

Yuuki - September 15, 2012, 1:54 pm

Saw that a good number of people started making Skype programs. Features and downloads are now up to date. Source and applications are available to download in the thread, but I'd still appreciate it if you left a thank you on the thread.

If you use this for one of your own programs you aren't required to give me credits.

LØØT - September 15, 2012, 2:35 pm

I wouldn't think so, it compiles fine for me. Maybe it's your Visual Studio acting up?

Then it's definantly just you, everyone that has been using this program when this first came out never reported that.

w?rloct - September 15, 2012, 5:32 pm

Looks very nice! I think about getting it...

LØØT - September 15, 2012, 6:28 pm

Any ideas what it could be? I'm using the latest skype.

Budz N Nugz - September 15, 2012, 6:43 pm

Holyfuck this is amazing, thanks for this!

Yuuki - September 15, 2012, 7:09 pm

(Sep 15, 2012 06:28 PM)?Mods Wrote: [\[CITE\]](#) Any ideas what it could be? I'm using the latest skype. I have completely no idea, seems to work on everyone else's PC.

Player - September 17, 2012, 8:16 am

Thanks! But when I run the program it won't load and after 20 seconds~ it shows that the program stopped working.

Cold_ - September 17, 2012, 8:33 am

Why is this such a large exe? and why can't i run it in Sandboxie? ...

Mr. Bot - September 17, 2012, 9:37 am

Thanks pretty cool and fun application.

Spamming friend ftw xD

Yuuki - September 17, 2012, 2:41 pm

(Sep 17, 2012 08:33 AM)Cold_ Wrote: [\[CITE\]](#) Why is this such a large exe? and why can't i run it in Sandboxie? ...

Probably because you have Sandboxie set to not modify other programs (ie. Skype)

It jumped from ~100kb -> 1mb since I added pictures to the menu entries.

SkyRider2 - September 17, 2012, 3:39 pm

Nice dude, I will being using this ill be sure to give credits. ^^

Zalg0 - December 5, 2012, 11:11 am

Cool program! Thanks for the contribution

ikiik - December 6, 2012, 6:36 pm

This seems legit and awesome. I'll pm you now for this.

Yuuki - December 6, 2012, 8:02 pm

(Dec 6, 2012 07:36 PM)ikiik Wrote: [\[CITE\]](#) This seems legit and awesome. I'll pm you now for this. There's a direct link in OP. Enjoy :)

Yuuki - June 26, 2013, 2:31 pm

Even though this was written when I had many bad coding habits, it still has the solution to all your "how do i make a skype FILL IN THE BLANK feature" questions. The source is right here. Download it and cut it out with all the Skype question threads.

Trollkarlen - June 27, 2013, 5:52 am

Looks good i'll use your source code in my next project(I'll give you credit)
thanks ?
