It just says it's closed.

He says he doesn't want google to ban his server IP address.

So, I guess there's no point in him giving away access to it.

(Jun 30, 2012 09:07 AM)_LikeABoss_ Wrote: [CITEI](#) php will never be faster than python..Would you mind explaining why?

If I run a Python script, that fetches data from the internet, on my slow ass internet connection, it'd take years, just to look up 10 websites.

But with PHP, I could put it on a host, and it'd fetch data from 10 websites in like 1 seconds.
