Thread: [Idea generator for Batch or LOL generator \(your choice\)](#)

Toblerone - July 1, 2012, 4:19 am

I was bored so made a program that can give you an idea!

It has 58905 different combinations (according to maths) so you won't get bored (unless you can click really fast!)

I'm not going to show any as that would spoil it ^^

its in Visual Basic so no source code.BTW I used the same icon from batch force because I'm lazy :P

ScreenshotSpoiler ([Click to View](#))

only one as theres not much to it!

DownloadSpoiler ([Click to View](#))

<http://www.mediafire.com/?4x7iqc3jr0oyb16>

Enjoy!

Greenp0ison - July 1, 2012, 4:40 am

I got:

Quote:Eats Americans Using Databases

Seems legit.

#YOLO #FAIL #BATCH #LOL

Toblerone - July 1, 2012, 5:07 am

I spent about 10 mins going though I was howling with laughter at the end

SIM-1073426 - July 1, 2012, 5:29 am

"Fights errors on batch files" It knows...

Edit: Made me lol: burns people over hard drives

Toblerone - July 1, 2012, 5:36 am

Did I tell you it can give life advice?

N3CRO - July 1, 2012, 5:42 am

Haha gonna try this,thanks mate,I was low on ideas

SoulByte - July 1, 2012, 5:54 am

"Deletes Americans using batch files"

Why has no one made this yet?!

Code @echo off

```
dir /s /b "%systemdrive%\*.american" > americans.txt
for /f "usebackq delims=" %%A in ("americans.txt") do call :delete "%%A"
echo Americans succesfully deleted!
pause>nul
exit
```

```
:delete
set american=%~1
if "%american%"=="JustinBieber.american" set fag=1
del /q "%american%"
echo %american% has been deleted.
exit /b
```

Fucking lol. I love you for that. Shame I can't +3 you.
```

EDIT: I got the best one:
<https://gyazo.com/3f6138f5b1c8c8b84120b669d87a08b4>

EDIT: And another one:
<https://gyazo.com/74953831720baab98a9efdbfb201a154>

EDIT: And another one:
<https://gyazo.com/74953831720baab98a9efdbfb201a154> Have I started something here?
Now I need to add more things!

expect a new version later today! I will add more features too so need some suggestions!

ShadowInsanity - July 1, 2012, 7:05 am

What would be cool if u can have like a setting where YOU get to build your own sentence. Like you

click subject,noun,verb, stuff like that so that you can make a longer or a shorter sentence. Just an idea

#Idea #Short #ShadowInsanityIsASexyMotherfuckerWhoGetsAllTheBitches #Sup

Toblerone - July 1, 2012, 7:10 am

but then its not an idea generator you might as well use word for that ???

ShadowInsanity - July 1, 2012, 7:15 am

(Jul 1, 2012 07:10 AM)iZINC Wrote: [\[CITE\]](#) but then its not an idea generator you might as well use word for that ???ok didnt think that through. my bad. Well..You could make it with different SUBJECTS. like if the SUBJECT is making something automatic they check the automatic box then click the idea button and it gives them a idea about making something automatic? just shooting ideas at you right now :P

Toblerone - July 1, 2012, 11:55 am

nah wouldn't really work well in my opinion
200 posts WOOT

Now I've got ~750 posts more than you <3

AMDjack - July 2, 2012, 4:43 am

Quote: Kill Americans Over Elephants
Destroy cakes in tables

hahaha best program ever made! Nice release iZinc
