Thread: [\[ShowCase\] MC client DL site \[ShowCase\]](#)

G?df?t?? - July 1, 2012, 9:16 pm

Hello HF! I just coded a website for everyone's convenience! On the website you can download public clients that are uploaded to the site. All of the clients that are on the site are scanned for a last login stealer before uploaded. You can even upload your own client! I put hard work into this site so please give me feedback on what you think of it. Thanks alot!

Webiste: <http://www.darkxcraft.com>

Love the idea, plus the design is very nice. Good job!

I say 3/10 for the complete website and 6/10 for the concept.

The layout is not perfect but not bad either, and the biggest thing is that the website is static, you should use a cms instead.
