Thread: [Cyber-Store.Net - Stealer](#)

Anatoxis - July 2, 2012, 3:21 am

My first Tool on HF, the Cyber-Store.Net - Stealer

The Stealer has a Steam Phing System.

Look at: <https://www.youtube.com/watch?v=IbDgulN6bgE>

That looks an AWFUL lot like iStealer. Same layout and everything.

For those of you who do not know what iStealer is, it is a program which takes your saved passwords from web browsers and uploads them to an FTP account.

I would strongly advise against buying from him, being that he only has 86 Posts and that he is showing a picture of an EXACT replica of iStealer.

The Panel is from the iStealer, my Builder is Self Code and his not using 3rd Party tools!

You should put that in the thread. You made it seem as if it is 100% your code. Which it is not. GLWS tho.
