Thread: [uJDB Referral System - Learn how to get FREE uJDB licenses!](#)

??s?? - July 2, 2012, 6:39 pm

Hello members of Hack Forum's and uJDB. I want to announce the release of the new Referral System we put in place to offer a license to the members who don't have the financial funds to purchase a uJDB license. Let me go more into detail on how this works...

It's simple, you get 2 people to register and purchase a uJDB license under your referral, and you receive points to get a free LIFETIME uJDB license. So let's break that down one more time:

2 referrals = 1 free license.

Now these points can be used to not only give YOU a lifetime membership, but a friend as well. We now offer the feature to just type in the name of the uJDB member you wish to upgrade, and it will spend your Referral Points upgrading them instantly. :)

How to get started?

Well to get started you should go to <http://uJDB.in/register.php> and make a free account. From there you just tell people to register as normal, but to make sure they use YOUR uJDB username when registering as a referral. If not, the points will not be added to your account.

uJDB Register: <http://uJDB.in/register.php>

uJDB Referral Shop: <http://www.uJDB.in/store.php>

Good luck to everyone trying to get a free lifetime license using our new referral system. :)

They have to purchase a license in order to have points added, and they will be added instantly.

Yes at the moment we undergoing a DDOS attack, currently working on mitigating the attack.

We are exceeding an amplified attack of around 12+ Gbps, pretty hard but we are working on it. If it get's to bad I'm just gonna null route all traffic. :P
