Oh, and a tip...when using adf.ly for blackhat methods, never shorten a url to say "google" since adf.ly will pick up on that and suspend your account, I recommend popular news articles now...and I learned the suspension thing the hard way a while back from using google =p.

Before making these useless posts go ahead and check out the video. Adf.ly bots are proxy made and can be related to creating a fake paypal. You will get a short gain and then be instantly banned via IP ban.

Once you purchase this you will not need any sort of third party client such as a crypter. You don't even need to spread. We have an official bot shop that gives 10% off to all customers.

Well lets do some math and break it down:

1k Bots = \$5 A Day

1k Bots + Bitcoin = \$7-8+ A Day

1k Bots = \$150 A Month

1k Bots + Bitcoin = 170-180+ A Month

Now if we multiply both by 10 we get:

10k Bots = \$1500 A Month

10k Bots + Bitcoin = 1700-1800+ A Month

Yes sir, the RAT does have the ability to download and execute other files, but it does not heard bots. it is preferred to use an external herder to maximize profit. You do not have to use the bitcoin miner. it is just there for to increase profit.

My warning level has nothing to do with my marketing or legitimacy. It was given to me due to a staff obviously having a bad day and not wanting to junk the LQ threads of mine that i had reported.

Our client is geared more towards adf.ly domination and we had decided to add in the miner as more of a bonus. But if you are telling me that 180+ dollars a month on 100% auto pilot isn't good than this product probably isn't for you.

Thanks! I am very interested in buying this too.Bots is a shorter term for "Infected Computer."
What our tool does is the following: It sends the "Bots" to a shortened Adf.ly url which pays you for the amount of traffic, in this case "Bots" that visit the link. It also mines bitcoins so you're making

money %100 auto pilot.

For more information on bitcoins read the thread layout and watch the videos.

Smooth fast transaction.

Waiting on my account to "Activate".

Excited to see how much I can earn off of this!

Kink - July 5, 2012, 9:28 pm

I can vouch for this as I've made some decent cash off adf.ly and if you utilize his tool properly you could probably make a shit ton. Most of these views (more then half of them) are revisits from the same people, as an fyi.

Oh, and a tip...when using adf.ly for blackhat methods, never shorten a url to say "google" since adf.ly will pick up on that and suspend your account, I recommend popular news articles now...and I learned the suspension thing the hard way a while back from using google =p.

It has nothing to do with the hosting. Your bin is still in the process of being made which is why you are getting that error. All bins are created within 24 hours of activation.

2. The miner is just an add onto the product to make it even more astounding.

This looks sick I would love this rat.

Themagicshark - July 7, 2012, 4:21 pm

Ya man its worth it, I recommend using a herder with this so you can re-run to ensure all of them get the bin

Why?, Im planning on sending the link direct. :/

Themagicshark - July 7, 2012, 4:48 pm

Because you have much more control and you can re run as you like. But that way would work to you just have to be sure that you name it something DIFFERENT THAN BEFORE.

Before making these useless posts go ahead and check out the video. Adf.ly bots are proxy made and can be related to creating a fake paypal. You will get a short gain and then be instantly banned via IP ban.

Lol, because infecting others to do the exact same thing is any more legal.

EDIT: What's this programmed in?

i got my 3rd adf account terminated !! i'm using youtube and other website as referrer but should i change the referrer every couple of hours because it seems when i leave it at night working they terminate it !

i don't know why!

what link you use and what referrer you use ?

Themagicshark - July 8, 2012, 12:24 am

That shouldn't happen with the new version, it even bypass's the locked page.

Some rules to go by

1. Make a youtube video

2. shorten a link to another youtube video
3. post it on the youtube you made, but shorten with google url shortener.

If anyone is having problems with adf.ly I have a 100% solution.

I own a website that gets a tiny amount of traffic.

I have put a free download on the main page of something like an e-book.

The download button is an adf.ly link leading to a fileice download.

I have 6,000 runs and I have not been banned.

Remember that adf.ly does not show real time.

The bots do not all click at once they have periodic runs to prevent detection. And with the periodic runs a tiny % would have to not click next due to real life behaviors.

You will get your clicks its just has to get warmed up. Think of it as a woman, you cant go in all guns blazing.

The creator has also added in adblue as to maximize the profit from the PPC sites, He is listing to your comments but just remember he is probably getting about 75 PM's a day, and that's without reply's.

He will reply once he has sifted through them, But remember to read the thread as a lot of information has been offered.

I had a question;

What if two "hackers" both infected the same "victim" with the Fuzion RAT?

Would the two "hackers" constantly be fighting over the "victim", or would it not matter, since there would be two instances of the RAT running?

Does this use proxies? Adblue and Adfly recognize the same IP addresses over and over again and begin to lower your rates and eventually you will be earning nothing from a bot.

Please let me know.

This does not use proxies, and Adblue and Adf.ly don't share traffic, and the rates don't lower from it.

I appreciate your answer but I've used adfly and adblue multiple times and my statement is true. Consecutive visits and clicks for an ad on the same IP address lowers the amount of money per click, but only from that ip, it will not lower your overall rate.

What do you mean they don't share traffic? Also would you mind explaining me the measures taken to make sure the adfly and adblue accounts are not closed for fraud?

Thanks :)
