Thread: [MULTI-TOOLS // My very first project // Bored? Open up Multi-Tools and do something!!](#)

Taunt - July 3, 2012, 7:22 am

Virus scan of MultiTool.exe: [Click here.](#)

Pictures:

Download link: <http://www.mediafire.com/?dz12qy9mqpkl88b>

Please remember this is my very very first time even using VB.net, Like the first time i've ever opened it, Give me feedback in this thread!

Theme source: <https://hackforums.net/showthread.php?tid=2267737>

Red_Ryder - July 3, 2012, 7:24 am

Can you provide Virus Scans to show this is not infected? Thanks! Looks good from the pictures. Good job OP.

tweety - July 3, 2012, 7:24 am

I will not download this, however, does the buttons just load up a webpage and that is all? Or does it have a form that actually does the converting and calculating etc?

EDIT: I downloaded it. OP, congratulations! You learnt how to use `Process.Start("www.google.com")`!

Now try make your own calculator etc.

Sorry! I didn't see it :b Good luck with it OP.

remysimpson - July 3, 2012, 7:28 am

thx you verry much sorry for my english li speack french sorry

Taunt - July 3, 2012, 7:29 am

I'd like everyone's opinions on it! ?

Bad_P1zza - July 3, 2012, 7:29 am

That's a nice first project, but tbh the theme makes any project nice :)

LolZ Gym - July 3, 2012, 7:31 am

Try making something where you will learn something from, this is pretty stupid..

Taunt - July 3, 2012, 7:31 am

True, I fell in love with the theme, I was going to make my first project with no theme since I didn't know how to implement it, But I had to research, It was to good to say no. ;D

tweety - July 3, 2012, 7:33 am

OP do you know what a string, array, integer and double is?

And can you tell me what this does (My own function):

PHP Code

```
<?php
```

```
Private Function C_Password(ByVal C_pass As String) As Boolean
```

```
    C_pass = getMD5Hash(C_pass)
```

```
    If C_pass = passwords(0) Then
```

```
        Return False
```

```
    ElseIf C_pass = passwords(1) Then
```

```
        Return True
```

```
    Else : Return False
```

```
    End If
```

```
    End Function
```

I really want an answer, so please answer me seriously.

No, I don't know what any of those are, I just started 2 hours ago, Give me a break.

xXx pR0 h4X0r xXx - July 3, 2012, 7:38 am

Credits to Mavamaarten for the theme maybe ?

tweety - July 3, 2012, 7:39 am

???

OP. I suggest you learn the complete basic's before you release anything. Seriously. Learn some string manipulation, integers and how to declare things properly. Then move onto using If statements, Try statements and Case statements. For each statement is pretty handy too. Learn this. Do it all in a Console application before you move onto a form.

Posting this is pretty useless to 99.99% of the members here. Do yourself a favor and learn properly. Or you may end up with gaps in your education. Wish you the best of luck!

Huskar - July 3, 2012, 7:41 am

This is my first time using VB too bro :D

I'm pretty sure that would just give u errors.. You never declared passwords and getMD5Hash isnt a function.

It's a snippet. I have declared them in my actual project. I was just asking if the OP knew what was going on within the function itself to test his knowledge.

If you started two hours ago, then you should go the the link in my signature. Do not mess your language education up.

Refer back to my post:

Couldn't you have at least made a simple calculator instead of just opening a web page?

Wargod - July 3, 2012, 11:14 am

Yea all are process.start . However it's good for first project. Go learn how to make your own calculator
