madmak - February 8, 2010, 11:57 pm

What is FireFox Stealer ? Is this kind of like PasswordFox? I hope so because i was trying to use PasswordFox on a Vista machine yesterday but everytime i executed the programe from a dos prompt on my RAT it kept opening the app on the victims machine and showing him all the passes but not saving them to my output file???? Luckily enough the guy didn't bother when all his passes showed up on his screen so i got away with it but didnt get the stuff i was after lol

newbie223 - February 8, 2010, 11:58 pm

yes its like firepassword :) its fud and works 100%

madmak - February 9, 2010, 12:01 am

Thanks newbie223 much appreciated ill give this a try when the guys back online and hopefully this gets the goods for me lol

Is there a pass for this?

.InSaNe - February 9, 2010, 12:01 am

whats the password????

StRaXxD - February 9, 2010, 12:08 am

Thank you very much for this man :))))

newbie223 - February 9, 2010, 12:10 am

no problem man :)

shorty msg

25 download 7 reply thx guys ==

madmak - February 9, 2010, 12:46 am

Looks nice newbie223 this is the first time iv seen this app but does this keep sending logs to my ftp server or does it just send the one when executed?

The reason im asking is that iv just tested it on myself to make sure it works (all my firefox passwords are fake anyway) lol

So will it stay on my pc and load when the pc's booted or will it only send logs when its executed?

p.s do you know if it works on vista?

newbie223 - February 9, 2010, 12:54 am

only when its executed :)

imAcarrot - February 9, 2010, 1:01 am

i will download... thanks for sharing ;)

madmak - February 9, 2010, 1:20 am

(Feb 9, 2010 01:54 AM)newbie223 Wrote: [\[CITE\]](#) only when its executed :)

Brilliant mate thanks ?

newbie223 - February 9, 2010, 1:25 am

no problem comon 30 downloads -10 replies :(

The 7th Sage - February 9, 2010, 1:25 am

Does this decrypt passwords and send? Or just encrypted ones?

newbie223 - February 9, 2010, 1:31 am

it decrypts them and then send it :)

The 7th Sage - February 9, 2010, 2:32 am

well thats cool then. ;)

newbie223 - February 9, 2010, 3:33 am

yea it is hahahs :)

shorty msg

FreestylI3R - February 9, 2010, 5:35 am

Thx again for you!! when I finish my logger credits going to you!

newbie223 - February 9, 2010, 5:44 am

ok sure :)

shorty msg

dam short for some reason

ShadowP2P - February 12, 2010, 11:40 am

thx men , it's very good

rxmxjxz - February 12, 2010, 7:20 pm

HEY, problem with ur stealer, it sends the logs to ftp, but it overwrites on the same txt

newbie223 - February 12, 2010, 8:50 pm

yeap so best way is

for ftp link put there

my.computer.name+".txt"

like that :)

SpyMac - June 18, 2010, 8:12 am

OMG thanks!!!!

thanks!

thanks!

Feather - June 18, 2010, 10:00 am

Thanks for the share mate.

nevoner33 - June 26, 2010, 6:14 am

Thank you for that!

I really wanna try this ;D

RockYy - June 29, 2010, 9:39 am

Thanks for sharing mate! Gonna try to understand this source.... I'm fucking new to programming :D

xAMOKx - June 29, 2010, 10:44 am

Now im feelin like the total noob -.- is this code outdated or is it really me? There has been a FF update within the past few days as i remember.. ?

Braco Asshole - June 29, 2010, 11:09 am

That is a pritty good FireFox stealer nice job.

smoofie - July 5, 2010, 5:47 pm

very nice. thx for sharing. ;D

jackjones6 - July 7, 2010, 8:20 pm

Mate, this is the best thing I've seen on this forum so far.

Great coding mate.

Thanks for the share.

I get an error when using the code in other programs though..

ERROR: Error 2 Type 'SQLiteBase' is not defined

Also a warning: Warning 1 Namespace or type specified in the Imports 'FFStealer.SQLiteWrapper' doesn't contain any public member or cannot be found. Make sure the namespace or the type is defined and contains at least one public member. Make sure the imported element name doesn't use any aliases.

Is there a dll I have to import into my project or something?

A COM component or something?

Oh right, stupid me :S

Just change the FFstealer to the name of your own project.

Again, thanks for the share mate.

Be sure I'll give you credits in my project I'll use it in.

HaXZX0r - July 8, 2010, 2:29 am

OFF@This is getting leechd as hell -.-. What's wrong with giving credits people??? :-P

ON@ Really f*** great job newbie! I'll be using this the day I need it. :-L

newbie223 - July 8, 2010, 3:01 am

i did give credits
short message

BETAhkr - July 8, 2010, 3:52 am

I tried a firefox stealer not to long ago and could not get it to work, I'm going to check this one out,
Thanks buddy!

Modesty - July 8, 2010, 9:18 am

always freezes when i try, hmm

newbie223 - July 8, 2010, 3:30 pm

this one oni works for 3.5/3.6
and if theres a master password well it would not work

silent463 - July 24, 2010, 7:45 pm

thanks bro im loveing this man now im going to figure out how to bind it to something

czarface - August 23, 2010, 6:27 am

It worked perfectly on Windows XP , but now when I tried it on windows7 , I am getting a nullexception for the parameter name ptr.

Any ideas why?

Taco Bell Dog™ - September 10, 2010, 7:47 pm

What do I need to change this too in order for it to work?

```
Code Public Sub OpenDatabase(ByVal baseName As [String])  
    If sqlite3_open(StringToPointer(baseName), database) <> SQL_OK Then  
        database = IntPtr.Zero  
        Throw New Exception("Error with opening database " & baseName & "!")  
    End If  
End SubError:
```

Code A call to PInvoke function 'FFStealer!FFStealer.SQLiteWrapper.SQLiteBase::sqlite3_open' has unbalanced the stack. This is likely because the managed PInvoke signature does not match the unmanaged target signature. Check that the calling convention and parameters of the PInvoke signature match the target unmanaged signature.

Any help thanx :)

n0\$f3ratu\$ - September 11, 2010, 9:04 pm

This is what i've got.

Thank you darksel and you guys for the source.

[img]<http://shareimage.ro/images/buji9h1t7meuyreh04g.png>[/img]

Krex Productions™ - September 12, 2010, 1:11 am

This is great mate, thanks for the awesome share.

-na.Talish - September 12, 2010, 1:36 am

Pretty sure this has already been released, correct me if I'm wrong.

ziglet^ - September 13, 2010, 12:41 am

Is it only for FTP So I can't add it to my stealer right?? coz my stealer uses SMTP. please help.

n0\$3ratu\$ - September 13, 2010, 7:53 am

It would be great if someone could make a TUT about how to make a stealer.

sida21 - September 13, 2010, 3:12 pm

i got this error...

[img]http://img256.imageshack.us/img256/5831/ffst.jpg[/img]

what to do, can someone help me ??

?

xms - October 21, 2010, 9:55 am

Thanks for the share...I will test it...

lexx13 - October 21, 2010, 10:29 am

what to do, can someone help me ??

?I don't want to disappoint you but every single FF stealer I have tried has the same problem in each: it does not load dll files properly. I will try to fix it as soon as I will have time.

Note: the part where function is supposed to return pointer from dll returns '0' which causes exception and error. Somewhere on gecko forums I have read that in order to succeed you need to load all dll required by FF. For some reason (I don't know about other pcs, maybe it is purely my side which causes this error, LoadLibrary would always return '0', however replacing it by LoadLibraryEx seems to be working).

So, in my opinion all lot has to be fixed for this to work.

Ps: tried on FF 3.6.

MoonWoLF - October 21, 2010, 12:30 pm

Thanks for the share mate !

Hope it works !

Tasemu - October 22, 2010, 9:42 am

Ill download for future reference. ^^

Thanks a bunch.

newbie223 - October 23, 2010, 7:46 am

ok weird this thing will work...btw hope u all enjoy any problem that i read is easily fix and would not be bothered to solve it gdlk to those

brayenrast - October 29, 2010, 9:39 am

merci pour ce logiciel franchement bien

Zer[o] - October 29, 2010, 1:09 pm

ill add a nice comment since proolly 500 didnt. this is a great share :)

antrandom - November 3, 2010, 12:05 pm

nice share ill have a look at this thanks

VonoX - November 6, 2010, 4:13 am

thanks for this source, it seems to be nice piece to learn from

Irion - November 6, 2010, 5:20 am

That's a pretty nice module IMO ...

Will save for future :)

Thanks.

roflrofl - January 26, 2011, 1:24 pm

does this use drops? or is it all code

h4yR0 - January 26, 2011, 2:36 pm

god damn I can't download from megaupload :((
any mirror ??? please

illegalWarrior1 - January 27, 2011, 12:31 am

how do i use it? a tut would be nice

Ryuchet - January 27, 2011, 12:33 am

Good job man , but I'm beginner ! so what this program does? ! send to victim then receive his info
?or>?

Shu7down - January 27, 2011, 12:41 am

Thanks for the share, I will need this :)

Ryuchet - January 27, 2011, 1:03 am

Is not working:((! i changed all info ! I click on the .exe to test ! then logs.txt from host is clean! (no
info)

MrPixel - January 27, 2011, 1:58 am

Does it use drops or is it all pure code ?

FET - March 31, 2011, 2:15 pm

Excellent work. A must use code!

Tr0ne - May 19, 2011, 12:15 pm

Quote:Does it use drops or is it all pure code ?
That pure code bro check :)

Ingenuity - May 19, 2011, 12:34 pm

Why did you just revive a 2 month old thread?!?

FreshHRS - May 19, 2011, 1:46 pm

Still fud? :D thanks alot anyways!

?ystem - May 20, 2011, 7:26 am

(May 19, 2011 12:34 PM)Jack Eagles1 Wrote: [\[CITE\]](#) Why did you just revive a 2 month old
thread?!?

Because some people browse through this section and check out some of the thread with relatively

high views and responses. Often times, disregarding when the thread had been made, as well as when the last post was made.

You do realize that you're questioning of why he ed the old, dead thread by posting in it has only just put you in the same situation that you've put him in, yes? And, yes, I'm quite well aware of me not being exempt from what I've said above, but I figured I might as well as answer your off-topic question. Regardless.

Newbie223, thank for you sharing this information. It has served to be of use to a large number of people. In fact, I'm relatively positive your code is currently being used by a majority of the "Stealers" in the Marketplace now. Give yourself a pat on the back, I mean it.

(May 19, 2011 01:46 PM)FreshHRS Wrote: [\[CITE\]](#) Still fud? :D thanks alot anyways!
It's just a source code he provided that takes the encrypted information that that specific version of Mozilla Firefox uses, and decrypts the information for you all to see.

Stenography - May 20, 2011, 2:05 pm
does it works on firefox 4.0 ??

im not sure but thanks anyway.

antrandom - May 29, 2011, 4:17 pm
thanks man good source 2 learn from

blade10327 - June 16, 2011, 1:31 pm
Thanks dude, this is a useful reference!

shayl - September 26, 2011, 7:44 am
i can't see the link .its say "WARNING: Potential SPAM or INFECTED LINK"
when i click
it just open a black tab
so you can pm me the link plzz

lol-cats - January 4, 2012, 3:29 am
thanks. this helped alot :) but dose this wok for the newest version of firefox??

iRtehLeet™ - January 4, 2012, 3:30 am
(Jan 4, 2012 04:29 AM)lol-cats Wrote: [\[CITE\]](#) thanks. this helped alot :) but dose this wok for the newest version of firefox??
[email=Sure doesn't.]You are not supposed to be reading this. Please do not continue reading and exit your browser immediately.[/email]

Versions 3-4 only.

Smoov3 - January 4, 2012, 10:53 am
Version 9.0.1 is already released. It does not works.

Red Sub - January 16, 2012, 11:48 am
I am downloading right now, thanks for the upload.
