Thread: [DarkComet - Final CLEAN version with prove.](#)

idonotcare - July 4, 2012, 2:22 pm

Okey, since there are people posting links and the people are getting confused about if its clean or not, this is the final thread with the final prove of a CLEAN download link

First of all, here is the download link to the darkcomet.zip file

<https://dl.dropbox.com/u/19917114/Downloads/DarkCometRAT531.zip>

Now to prove this is real, you need a tool which creates a md5 hash out of files

Here is a tool to compare hashes

<http://localhostr.com/files/ftf8ZSz/Checksum.exe>
<https://dl.dropbox.com/u/19917114/Downloads/Checksum.exe>

What you do is download this tool, drag and drop the darkcomet zip file into the application and you will see at the md5 hash section an md5 hash, it should look like this

Spoiler ([Click to View](#))

[img]<http://localhostr.com/files/hxXKAwk/capture.png>[img]

Now you go and google the md5 hash, and since darkcodersc was smart and provided md5 /sha hashes to his download for users to verify that the download is clean, you can be sure that this is infact a clean version of darkcomet.

If you are really paranoid and dont even trust the md5 check tool, download the source code of it here and compile your OWN version.

<https://dl.dropbox.com/u/19917114/Downloads/Checksum%20%28Checksum%20Calculator%29.zip>

By the way, just so you know, you could even md5 a 10 gb file and compare it with another 10gb file which only has 1 bit different and it would be a total different hash, thats how accurate md5 hashes are.

Now have fun.

Credits : Aeonhack (Checksum), DarkCodersc (Darkcomet)

BACKDOORED

[RuN] - July 4, 2012, 3:13 pm

it is the md5 checksum tool that i scanned fool calling me a retard and you cant even read it ??

Fail > i posted the source code of the checksum and when you compile them they have an addential hash, you fucking fail.

BACKDOORED

He's right, you should of downloaded the clean version at the site while it was there, ?

Thanks, atleast you got a brain because i provided the source code of the hashing tool and the if you hash the darkcomet zip file you get the original hash you even have on the darkcomet website.

learn to spell first wtf is addential??.. you could of back doored the source.

It monitors my keystrokes look at the scan lmao

mayboz127 - July 4, 2012, 3:19 pm

Uhhh why not just get it from the site? What's wrong with it?

[RuN] - July 4, 2012, 3:19 pm

It's not posted there anymore, he's down with that project atm.

idonotcare - July 4, 2012, 3:23 pm

(Jul 4, 2012 03:19 PM)Kan3 Wrote: [\[CITE\]](#) I already have a clean version and don't need his version But yet you make yourself look stupid by saying its backdoored while even the md5 hashes match lmao.

(Jul 4, 2012 03:23 PM)Kan3 Wrote: [\[CITE\]](#) MY own clean version

[img]http://imgghost.me/images/t0YIC.png[/img]

funny they have different hashes isn't it

Again, you are proving to the entire community that you are stupid, you are hasing the .exe file, while i hashed the entire ZIP file.

[RuN] - July 4, 2012, 3:38 pm

Yet again you are proving that you cant read i stated that the md5 tool was sketchy

idonotcare - July 4, 2012, 3:40 pm

How is it sketchy if i posted the source code of it and its only like 10 lines of code, just because you dont know how to code and dont know how to analyze tools and make yourself look like an idiot doesnt means other peoples tools are backdoored

Fucking LOL! wait what have you actually coded? NOTHING.

and i know how to analyse things... nigguh you can not even spell how the hell you code?
you claim .NET is like a AK47 and Masm (assembly) is like a stone.. only moron here is you.
go play with your copy of dc like the skiddy tard you are..bye bye

idonotcare - July 4, 2012, 3:53 pm

I can code this in 10 minutes if you really want me to and even make it opensource, but since aeonhack already did it there would be no big point in it, also what did i code? I coded a crypter and released some open source projects.

Now tell me, what did you code again?

Btw, i dont use darkcomet, just was sick of the people trying to gain something out of the download link.

nitoh - July 4, 2012, 4:17 pm

ok this is getting waaaay out of topic XD
