We never force settings on u thats why its called recommended settings we have over 200 Clients and a live support chat in the crypter never see u post anything and if you updated your crypter in the option in it u would not have problems

anyhow Crypter is FUD and im online for fast sales / support

Sorry, but it is pretty much forced if you have to use a certain logo and name for your server to be FUD, and even if it's scantime fud it's not runtime as I sent my server to my test machine that had Kapersky on it and it was detected when executed. I've also posted numerous times in the live chat but never see anyone about with fixes to solve this issue. Sheikh is quick to update and support but the end result is just crap.

Zero. - July 5, 2012, 11:07 am

This crypter is pretty good and at the moment it is FUD. Every time that it becomes detected a new update is released to make it FUD again.

Thanks! ?

SUGGESTION:

I recommend that a webpage be developed where users of Sheikh Crypter be able to add what settings they used to get the optimal FUD for the latest updates.

I have been waiting 12 hrs for you to activate mine?
And I even bought this 28hrs ago.
Did I get scammed? or is it cause there is no support?

Starz- - July 8, 2012, 1:56 pm

Where did u buy it from Website ? cause u have not contacted me what so ever and sent nothing to me i am the reseller let me know so i can help sort your problem

I wish I contacted you straight away but I was simply following the instructions I got from the support on the website.

I will reply again to this thread, confirming your patience and support, once my account is activated. Thank you for your time

EDIT IN:

My account was activated. " Starz- " was a great helper. Best support I could ask for.
