VulTester by Killur

Hello everyone,
today I wanna show you a small program I coded yesterday.

What can it do? Scan single Page for SQLi Vul
Scan single Page for LFI Vul
Scan multiple Pages for SQLi Vul
Scan multiple Pages for LFI Vul

How does it work?

When you open up the program, you get a menu. Choose what you want to do.
If you chose "Scan single Page for SQLi Vul" or "Scan single Page for LFI Vul", just type in the page you want to check (with path and parameters) and it'll check it will check it for you!

If you want to scan multiple Pages for SQLi/LFI Vul, you need a .txt-list with the pages in it, like this:

Code <http://deadfall.org/articles.php?id=139>
<http://www.fage.org/fr/articles.php?id=12448073283984>
<http://www.marktkirche.de/template/index/articles.php?id=88>
<http://www.deadfall.de/articles.php?id=295&PHPSESSID=11ed9cb9a047b80e45db0fa0b3152aa8>
http://web381.can14.de/template/index/articles.php?id=108&page=April&cat_id=15
<http://jroza.jr.funpic.de/www/articles.php?id=50>
<http://www.banburyunited.co.uk/articles.php?id=124>
<http://www.planningdesign.co.uk/articles.php?id=3>
<http://simdom.si.funpic.de/thesims2/articles.php?id=3>
<http://www.framesolve.co.uk/news/articles.php?id=45>
<http://www.mountain-bike-cumbria.co.uk/articles.php?id=gmbc2008>
<http://www.nikujaga.co.uk/articles.php?id=>
<http://www.advancedwords.co.uk/articles.php?id=57>
<http://www.starlightpublishing.co.uk/thehistoryfiles/articles/England/articles.php?id=40>
<http://www.businesssolutionsmag.co.uk/articles.php?id=14>
<http://www.ferret-crossing.co.uk/articles.php?id=65>

You take this file in the Folder "Lists", which should already exist.
Then you choose if you want to SQLi Scan this Pages or LFI Scan them.
When you made your decision, type in the name of your file.
And, the scan begins!

But.. Where can I find the results?!

You can find your results of the test in the folder "Lists/Found".
When you chose SQLi test, there is a file SQLFoundPages.txt.
When you chose LFI test, there is a file LFIFoundPages.txt.

Where can I get my lists to scan from?

You can look for some on Google, or just use the 13 .txt files I give you.

THIS 13 FILES ARE MADE BY POIZON!

DisadvantagesNo GUI

Where do I get it from?

Just post here, I'll pm you with the link.

PLEASE DON'T PM ME!

Last Words :P

So, if there would really be some people who want this, I think about making a GUI.

But just if there are some. I don't make a GUI for 2 people :D

There could also be some bugs. I hope it works for u. I have a x64 W7. Hopefully it works on x86, too. If not, pm me. PM me all bugs u find! :)

Have Fun! ;)

I don't know why McAfee-GW-Edition says "Heuristic.BehavesLike.Win32.Backdoor.H", but all other 41 say nothing, so you can be sure it's no virus!

Also just a bit of advice, add some "sparkle" to the thread. Add colors, different font, hell, even throw in a thread design(if you can do graphics). It looks better :3 <3

Okay :D Maybe later^^
