Thread: [Who has tryed eating nutmegs before and who wants to try eating them?](#)

-DMT- - July 6, 2012, 3:55 am

Eating 4 nutmegs will get you a hardcore halluzanagenic high after 6 hours. Me and a friend are gonna do it (its my 4th time and his 2nd). Were gonna eat 4 we have a trip sitter and everythings planned. I hope I can see my self from a birs perspektive again.

After this one time Im gonna stop for good though. No more drugs. Alcohol is enough.

I was just asking to see who knows about it and who has done it before and who is planning on doing it in the future, cause it is lots of fun but it is kinda scary the first time too...

Natalie Portman - July 6, 2012, 3:57 am

Do you mean four teaspoons of nutmeg? #Bullshit.

I SERIOUSLY doubt even eating four nutmeg nuts would give you a "hardcore halluzanagenic high after 6 hours". Plus, after SIX HOURS?! You'd have to wake up at like 6am and do it then to get any fun out of it.

Sounds bullshit, and sounds shitty even if it isn't bullshit.

Good luck!
- Alucard.

Or you do it at 12 pm and are high at 6 pm to 12 am. BUIt watch out if oyueat 4 nutmegs (4 nuts thats 24 gramms of the powederd nutmeg) You arent really able to move that well anymore.

And it does work. Remember over 30 gramms is a overdose and you might die only eat under 30 gramms!

Try it out eat 4 nutmegs right now :D or 24 grams of the powdered stuff just dont let your prents catch you :D

Greyon - July 6, 2012, 6:00 am

Ohh man. I feel like masturbating now :) :)
