Thread: [Planet Minecraft Server Banner](#)

Arbitrary - July 6, 2012, 9:23 am

I need a server banner for my server on PlanetMinecraft and was wondering if anyone here could do that for me?

The file needs to be 468x60 jpg, png, or gif. With a max file size of 200kb. I would prefer a .gif but any will do.

I want the banner to have a nether type theme that goes along with this picture:

Spoiler ([Click to View](#))

Maybe have it show all the admins that are in that picture in the banner?

The server name is PieCraft so having that on the banner would help. [Link to the PlanetMinecraft post.](#)

Thanks for anyone who helps with this! I'll make sure to thank everyone even if I don't use their banner.

Here's mine. I didn't know what color to make the text. Will change on request.

Here:
