Thread: [\[FREE FOR NOW\] Warzone: Armageddon Auto-Collect and Deposit Base Money \[TRIAL\]](#)

cysto - July 7, 2012, 1:20 am

I made a bot recently for auto-collecting the money earned in Base in the game [Warzone: Armageddon on facebook](#)

I've been running 3 instances of the bot for two straight weeks (24/7) and haven't faced any trouble at all.

It's pretty fast and stable. It collects the money (and oil) from the buildings you have in Base as soon as they're ready and deposits them into Bank automatically (in order to avoid any money loss in battles, but I can disable it on request if that matters).

As soon as you have enough money, purchase buildings with 1-hour-collect delays, since they're much more profitable with this 24/7 online bot.

In order to have an idea about how many players of this game on HF there are, as well as getting some future vouches if I decide on selling this service, I'll provide 5 members with a 1 week trial of this bot. You'll soon be richer than you ever were.

All I need is your facebook profile ID (the number, not e-mail, no need for password either), and the game token (I'll guide you how to get it with step-by-step instructions). The bot will start immediately and collect the money as soon as they're ready.

If you think it's a great service which could be eventually sold, please suggest some prices for the service, in terms of days (e.g: 1 day = \$2)

Be fast! I'll give this trial to 3 upgraded members and 2 normal members...

PM ME TO GET THE SERVICE! I will try to check the thread frequently too.
