Just like my private DDOSER (<https://hackforums.net/showthread.php?tid=2309804>) I Thought I'd Release my private SQLi Scanner v1.0 for you to check out and review. I'm only releasing the link to Leet & Uber members due to skids removing my code and ruining this thread.

If you're interested, reply and I will PM you the link.

Thanks for viewing my thread. ?

v11 - July 8, 2012, 2:34 pm

I got it, and this is great.

The only thing I think that needs to be fixed is that when you search for cetrian dorks, say index.php you get sites that are webmaster forums and it has SQL vuln marked and the site is not actually vuln.

Hey, I would love this! If this is still available, please send me a PM! Thank you. :)

EDIT: I just read your post directly above mine. The link you have provided in your post does not seem to load for me so I take it that it is your old version of this. If you have an updated version of this scanner, I would be more than appreciative if you would be willing to share it with me. If you do not have an updated one or for whatever reason do not wish to share it with me, I completely understand. Thank you. :)

Good job

@xijailbreakx - August 5, 2012, 5:56 pm

If you cannot even perform manual SQLi, you shouldn't even bother hacking. It's one of the most basic and easy to learn techniques. Using a script or a tool to do it for you is completely noobish.

Mr.FluffyBunnyFluff - August 5, 2012, 6:26 pm

i would love to have this man thanks alot!!! :D
