Thread: [? ? ? \[Misspelled\] OG PSN Accounts For Sale ? ? 4 Accounts ? ? \[Trade\]\[Sale\]](#)

royal?y - July 7, 2012, 9:54 pm

As many PlayStation users know PlayStation Accounts are probably the hardest accounts to actually find an OG. These accounts I'm selling all have capital i's for the L, but even that is rare to come by on PlayStation. If you don't believe me then go try to make an account with any good name even misspelling it. I can almost guarantee you that you will not find one even after trying for hours. These accounts are mainly blank, but may have a very small amount of MW3 played on 1 or 2 of them. Anyway, here are the accounts.

Vandalous
Uncivil
Unequal
Adderall
Acidizer
Instill

If interested, pm me with your offer. Please do not send any BS offers and waste my time though. Do not flame for them being misspelled as I put it in the title so you would know before you clicked it.

I prefer Payza, but will accept Paypal as gift only.

I may trade for facebook accounts, other OG accounts, Facebook Likes, YouTube Comment Rater, etc... If you have something that can bring me traffic I might accept it so just pm me the offer.

Thanks

That's why I stated "misspelled OG" if they weren't misspelled then yes they would be OG. Not for Xbox, but they would be very OG for a PSN account.

If interested PM me offers. Worst I can say is no!

Any account for \$10 except Vandalous. Pm me if interested.

Make some offers guys. Need some \$\$\$... Lol

People on PS3 want OG's badly. I got offered \$300 for Supremacy and prior to that \$250 and \$150. OG's are rare on PS3.

Yes, I realize I will only get about a 1/4 or so of what the actual OG would be, but these are MUCH better than anything you can make or find anywhere else at the moment I promise you that. You can sit at the computer for a full day trying to make a misspelled OG and want even be able to find ONE! It is ridiculous...

Yeah, thats a good PSN. I have a couple actual OG PSN's, but I will not be trading them anytime soon. Maybe sell when the PS4 comes out and make a killing :)

No, the L's are i's. I mentioned it in the title and description, lol ? That's why they are a lot less than an actual OG, but hundreds \$\$ less. They look exactly the same in 90% of games though. :)
