Thread: [How do I make a website think I'm running Windows when I'm actually running Ubuntu?](#)

Akia23 - July 8, 2012, 2:52 pm

The title says it all, how do I make a website think I'm running Windows when I'm actually running Ubuntu? Not, the internet browser but the OS. I bought a new hard drive but it wont be hear until 2moro which sux cuz i'm facing 6 months in county...

Thanks

Akia21

What does your browser have to do with getting a hard drive?

This may help. Not sure if it'll work on Ubuntu, but it should.
