Thread: [How to make your hardrive unrecoverable](#)

Xelteam - July 8, 2012, 3:15 pm

Just wondering, how do you make it so your hardrive files can never be recovered?

AOITGeek - July 8, 2012, 3:23 pm

It all depends on how forensically sound you want it to be (e.g. the FBI/NSA pulling off your documents or your buddy with a cracked version of a forensics program). If you say #1, see the below link. If you want #2, there are a few programs out there that like Wipedrive or BC Wipe (I've got both if you need them).

A big mallet will do fine. If not try a bigger one.

It's just a pashtun man drinking some tea, eh eh eh eh ?

DubstepCraig™ - July 8, 2012, 4:22 pm

You take a bucket of lava and you slowly pour it all over the hard drive - that way it wont recover.
