Thread: [\[FUD 0/42\] \[JAVA\] jFork - The original Java keylogger! CHEAP! \[JAVA\] \[FUD 0/42\]](#)

Jire - July 10, 2012, 1:53 pm

jFork

The original Java keylogger!

jFork is an 100% Java keylogger.

The price is just \$15.00 USD for life! This is the cheapest keylogger on HF.

[Download Software](#) (to create your HWID)

Then, put your HWID into the text box on the purchase page.

[Purchase Page](#)

The Features List

Full lifetime support!

Full lifetime updates!

FUD for a very long time

Works on any machine with Java installed

Add-to-startup

Supports unlimited clients

Automatically continually attempts to reconnect to server

Captures keystrokes (including backspace, enter, shift, control, caps-lock, function-keys)

View keylogged characters, dump to file

Uninstall jFork remotely (through the server)

Disable/enable machine mouse

Send remote keys to type to a machine

Download & execute any file

Automatically grab Minecraft information from the machine

Show a fake message (with the text of your choice)

Shutdown the remote machine

Extremely tiny client & server!

nofear1999 - July 10, 2012, 1:53 pm

Even Java software can't be FUD for life because some AVs can actually scan java files and that's why Drivebys aren't "FUD FOR LIFE"
Don't lie.

You Are Free - July 10, 2012, 1:54 pm

(Jul 10, 2012 01:53 PM)nofear1999 Wrote: [\[CITE\]](#) Even Java software can't be FUD for life because some AVs can actually scan java files and that's why Drivebys aren't "FUD FOR LIFE"
Don't lie.

Driveby's aren't "FUD FOR LIFE" because of HTML elements and other related issues. Java signature may have a very minuscule part in it.

I used to respect you man. :(

Alex™ - July 10, 2012, 2:05 pm

(Jul 10, 2012 01:54 PM)Zio Wrote: [\[CITE\]](#) Driveby's aren't "FUD FOR LIFE" because of HTML elements and other related issues. Java signature may have a very minuscule part in it.

I don't think thats correct sorry. Actually i'm pretty sure its not.

-Base- - July 10, 2012, 2:09 pm

Vouch. It works great and is undetectable! Already got 2 minecraft accounts!

????Chicago Bulls - July 10, 2012, 2:10 pm

Yeah, not sales trashing, but java is not FUD for life, please change that unless you can totally prove me wrong :].

SIM-524734 - July 10, 2012, 2:11 pm

Are you sure this is 100% Java, and you're not using JNI?

Anubis - July 10, 2012, 2:14 pm

This is so fucking retarded. Since when Keyloggers have these features?!

Code Disable/enable machine mouse
Send remote keys to type to a machine

Download & execute any file
Automatically grab Minecraft information from the machine
Show a fake message (with the text of your choice)
Shutdown the remote machine
Those are RAT features.

This is so gay and fake.
And you don't even know to post a paypal button.

You Are Free - July 10, 2012, 2:16 pm

(Jul 10, 2012 02:05 PM)Alex™ Wrote: [\[CITE\]](#) I don't think thats correct sorry. Actually i'm pretty sure its not.

Most Java Driveby's can be made "FUD" again by simply changing around stuff in the HTML, like you'd make a C++ or VB.net application FUD by making values random and functions randomly named. etc.

Jire - July 10, 2012, 2:17 pm

(Jul 10, 2012 02:11 PM)Ecoste Wrote: [\[CITE\]](#) Are you sure this is 100% Java, and you're not using JNI?This does use JNI, but has implementation for Window, Mac, Linux, and Solaris.

(Jul 10, 2012 02:10 PM)En©ryption Wrote: [\[CITE\]](#) Yeah, not sales trashing, but java is not FUD for life, please change that
unless you can totally prove me wrong :].Java is FUD for life in this specific application. It does not use "bad" native code, code that would be flagged.

Stupid - July 10, 2012, 2:18 pm

This is stubless, so basically FUD4Life.
I guess not on Runtime base, though, am I right?

Jire - July 10, 2012, 2:20 pm

(Jul 10, 2012 02:14 PM)Anubis™ Wrote: [\[CITE\]](#) This is so fucking retarded. Since when Keyloggers have these features?!

Automatically grab Minecraft information from the machine
Show a fake message (with the text of your choice)
Shutdown the remote machine
Those are RAT features.

This is so gay and fake.
And you don't even know to post a paypal button.This is not a regular keylogger, we decided to include extra features. This is not fake, you can try it out yourself. Also, yes, I don't know how to post a PayPal button that also has the textbox field above it.

(Jul 10, 2012 02:18 PM)peter200 Wrote: [\[CITE\]](#) This is stubless, so basically FUD4Life.
I guess not on Runtime base, though, am I right?FUD on runtime as well.

Stupid - July 10, 2012, 2:21 pm

(Jul 10, 2012 02:20 PM)Whom Wrote: [\[CITE\]](#) FUD on runtime as well.
For now, but not 4Life, right?
I'm pretty sure that wouldn't be possible ;)

Jire - July 10, 2012, 2:23 pm

(Jul 10, 2012 02:21 PM)peter200 Wrote: [\[CITE\]](#) For now, but not 4Life, right?

I'm pretty sure that wouldn't be possible ;)No, it's possible. It's FUD for life. There is no way for an antivirus to detect without also triggering false-positives. You need to remember that programs do download & execute files, programs do let you send messages, use robot, and wait for key presses.

tweety - July 10, 2012, 2:30 pm

(Jul 10, 2012 02:23 PM)Whom Wrote: [\[CITE\]](#) No, it's possible. It's FUD for life. There is no way for an antivirus to detect without also triggering false-positives. You need to remember that programs do download & execute files, programs do let you send messages, use robot, and wait for key presses.

It is not FUD for life to my understanding. AV's also check if processes or memory is being tampered with, accessed system files, unusual behaviour and the usage of global keyboard hooks. Theirs more to it than just 'signature'. If you are certain about this claim, distribute your stub to a few AV companies and we will see the outcome. At the very least upload it to VT.

Jire - July 10, 2012, 2:33 pm

[link=<https://hackforums.net/showthread.php?tid=2585990&highlight=keylog>]Free JFORK[/link]

<https://hackforums.net/showthread.php?tid=2585990&highlight=keylog>

Thats an old free version. This is completely new, started from scratch.

Suit® - July 10, 2012, 7:54 pm

I guess we can take your word for that?

-Base- - July 10, 2012, 8:01 pm

(Jul 10, 2012 07:54 PM)Suit® Wrote: ([CITE](#)) I guess we can take your word for that?

Yes considering I made this with Whom? Check the screenshot of the jFork and the first video.

Jire - July 11, 2012, 3:18 am

(Jul 10, 2012 07:54 PM)Suit® Wrote: ([CITE](#)) I guess we can take your word for that?Yes, we remade this from scratch. The free version is buggy, and only supports one client (so you can only keylog 1 person)

Anyway, me and Baseball435 have plans for a GUI and turning this into a full-fledged RAT like Blackshades :-)

TheMedigator - July 11, 2012, 3:56 am

ok looks nice but say you get 100 connections , how do u pick which one u send commands too? didnt see that anywhere.

Jire - July 11, 2012, 4:04 am

(Jul 11, 2012 03:56 AM)Mundo Wrote: ([CITE](#)) ok looks nice but say you get 100 connections , how do u pick which one u send commands too? didnt see that anywhere.You see in the screenshot it says Thomas#Thomas-HP has connected? Thomas#Thomas-HP is the identifier of the machine. For example, yours might be Mundo#Mundo-PC

Sutorimu - July 11, 2012, 4:23 am

If you are interested in giving out a Review Copy i can do this :)

Anyway GLWS Seems like a good Keylogger.

-Base- - July 11, 2012, 2:55 pm

You'd have to ask Whom, I know we've already given out a lot of vouch copies

Sutorimu - July 12, 2012, 12:23 am

(Jul 11, 2012 02:55 PM)Baseball435 Wrote: ([CITE](#)) You'd have to ask Whom, I know we've already given out a lot of vouch copies

Vouch copy is not same and HQ as Review but its alright :=)

No need if you already got many vouches :P

-Base- - July 12, 2012, 1:22 pm

Haha I didnt say you couldn't I just said to talk to Whom to make sure :P

Leg?nd - July 12, 2012, 1:29 pm

Isn't /42 only virustotal? OT: It looks interesting may buy later.

Jire - July 14, 2012, 10:19 am

(Jul 12, 2012 01:29 PM)Cr?p Wrote: [\[CITE\]](#) Isn't /42 only virustotal? OT: It looks interesting may buy later. We are completely FUD, runtime & scantime.

BTW guys, here's an update with the GUI preview!

[img]<http://dl.dropbox.com/u/26438996/jFork/gui.png>[/img]

Got the chance while helping another HF member configure it earlier to take a look at its functionality and I was rather impressed. Good luck with sales, you have a great product.

Zeon - August 8, 2012, 3:08 am

Does this require port forwarding?

Jire - August 8, 2012, 2:24 pm

(Aug 8, 2012 03:08 AM)Zeon Wrote: [\[CITE\]](#) Does this require port forwarding? Yes it does, however, I can help you to portforward. If that doesn't work, I can give you my UPNP forwarding tool that should do the job so long as your networking router has UPNP enabled.

DoraTehExploda - August 8, 2012, 3:43 pm

It's been FUD for 4 weeks & 1 day! Damn, nice shit man!

Jire - August 11, 2012, 5:16 pm

Working on the GUI still! Update is almost done!

[img]http://sphotos-b.xx.fbcdn.net/hphotos-snc7/581330_414744701910733_1135089129_n.jpg[/img]

chris305 - August 14, 2012, 9:15 am

Wow, this looks good. I'd love to buy this when the gui is finished!

h3rc - January 19, 2013, 11:08 pm

Do the client.cfg and server.cfg still come with the download? can't seem to find them to edit them as the instructions say...

Also, can the client.jar be bound by any process (cmd etc.)?

And for those of you who just want to send an email of a java update and make it look identical I have it made already just PM me!

By the way...

A BIG VOUCH!

Didn't pick up at all on any AV :)

Jire - January 19, 2013, 11:38 pm

(Jan 20, 2013 12:08 AM)h3rc Wrote: [\[CITE\]](#) Do the client.cfg and server.cfg still come with the download? can't seem to find them to edit them as the instructions say...

By the way...

A BIG VOUCH!

Didn't pick up at all on any AV :)The client.cfg and server.cfg are inside their respective JAR files. To access/edit them you must open the respective JAR with any archive file viewer, such as WinRAR or 7Zip.

The client can be bound to anything, it is executed by Windows' choice upon native execution request.

Gpure - January 25, 2013, 6:20 pm

I'm guessing you need to open ports for this since it has Remote Desktop/File Manager?

Jire - January 25, 2013, 6:50 pm

(Jan 25, 2013 07:20 PM)Gpure Wrote: [\[CITE\]](#) I'm guessing you need to open ports for this since it has Remote Desktop/File Manager?Where are you seeing this at? There is no remote desktop or file manager.
